

Digital transformation continues to dominate business sentiment with vast improvements in process automation, customer experience, data integration & Analytics.

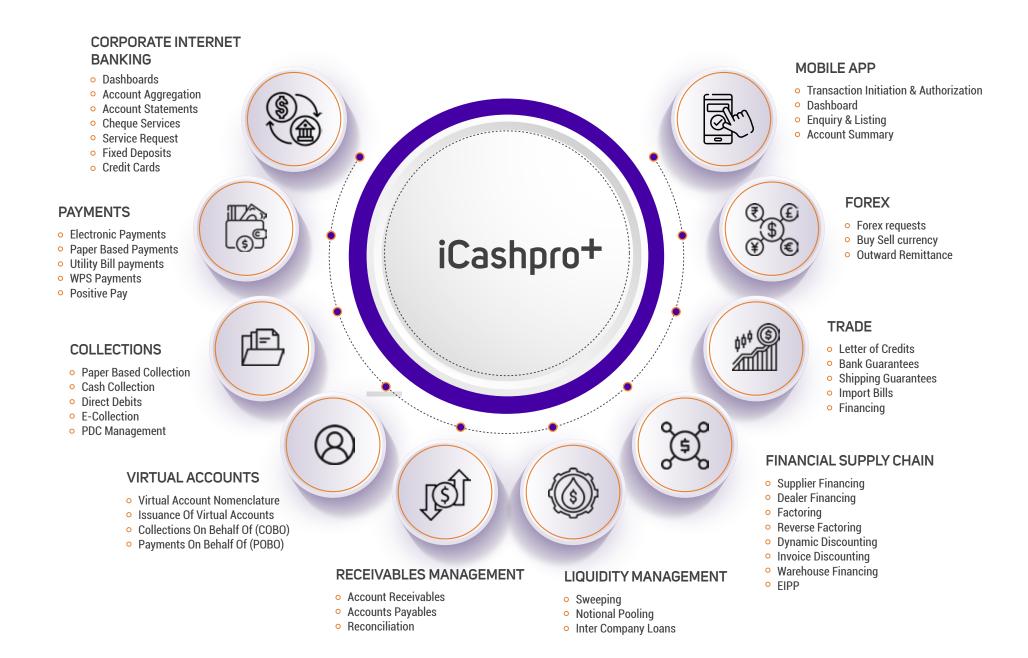

To ride the digital bandwagon, Financial Institutions require modern technology with flexible controls to spearhead innovation.

The Challenge is to provide a truly digital platform which can enable platform led transformation to the banks and yet provide economies of scale.

Guided by the dual mandate of driving front-to-back digital journey and cost effectiveness, Aurionpro offerings are built on state-of-the-art Microservices architecture benchmarked to handle over 5 Mn transactions per hour with 6000+ concurrencies.

The goal of iCashpro+, an integrated transaction banking system, is to improve corporate and small & medium-sized enterprise (SME) customer experience and operational efficiency, which will increase banks' income streams.
