ARICOMA

Business Central workshop

Get experts to help your team work smarter and adapt faster

As your company grows, you want to ensure business continuity and seamless management across finance, operations, and sales. We can help you explore what this looks like using a modern, cloud-based business management solution that is easy to use, integrates with your other systems, and provides built-in AI capabilities and enterprise-grade security.

Experience a better way to work with an AI-powered solution built for SMB

Discover what's possible when you align your technology investments to your business goals. This engagement starts with a review of your business objectives followed by a visualization of Microsoft solutions in the context of the key scenarios for your organization. It ends with a clear, actionable picture of how we can help you start realizing the benefits of the cloud and AI.

What will we learn?

Understand relevant capabilities and build a plan that aligns your business outcomes with your vision.

Who should be involved?

Include Finance Director, VP of Finance, executive-level sponsors, managers, and individual contributors.

What happens after?

Once completed, you'll receive an overview of workshop findings and recommended next steps.
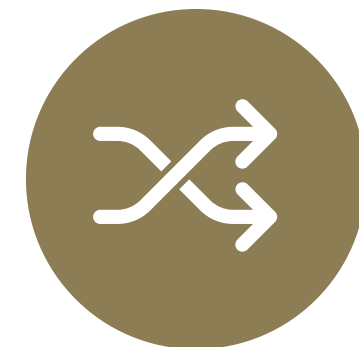

ARICOMA

What to expect?

Analysis of the current situation: We will review your current systems and processes and identify key areas for improvement.

Scenario exploration: We'll focus on specific scenarios such as automating financial operations, simplifying inventory management, or speeding up the closing process.

Process optimization design: using tools like Microsoft Copilot, we'll think together about how to streamline day-to-day operational tasks and how AI can help you better manage data and automate routine processes.

Benefits of digital transformation: you will discover how moving to Microsoft Dynamics 365 Business Central can increase your competitiveness, improve decision-making through better access to data and enable your team to work more efficiently using modern technology.
