ARICOMA

Transform your business processes with the Power Platform

Power Platform Consulting services: 1-Day Implementation

ARICOMA will introduce you to the capabilities and best practices of the Microsoft Power Platform - enabling the development of your company

Thanks to our experience from many projects in various industries, we also provide help with the implementation of the Microsoft Power Platform solution.

WHAT WE OFFER

Analyse data, build applications, automate processes, and create virtual agents, easily and quickly with the Power Platform. Take advantage of this state-of-the-art platform for the digitalization of anything - from productivity improvements to comprehensive and unique business process solutions.

We will help you implement and integrate business processes with the latest technologies, such as Power Platform, which consists of Power Apps, Power BI, and Power Automate. Power Platform creates low-code solutions and uses ready-made connectors that can be directly connected to the system. This minimizes time and effort for development and implementation.

As part of this one-day event, we will introduce you to the implementation and possibilities of using the Power Platform. We will also deal with your questions.

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Microsoft Dynamics 365

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.
