

ARICOMA

Power Platform Consulting services

1-Day Implementation

Transform your business processes with the Power Platform

Analyse data, build applications, automate processes, and create virtual agents, quickly and easily.

CHALLENGES

Are you looking to streamline routine activities in your company? Are you dealing with the pressure to accelerate internal processes and their automation, but do not know where to start and what tools to use? We have a solution for you.

IDEAL SOLUTION

Take advantage of this state-of-the-art platform for the digitalization of anything - from productivity improvements to comprehensive and unique business process solutions.

DESIRED OUTCOMES

Get exactly what you need to respond quickly to the changing needs of your company - in days, at lower costs than regular software development.

Power Platform Consulting services

1 Day Implementation

ARICOMA will introduce you to the capabilities and best practices of the Microsoft Power Platform - enabling your company to grow.

1

ARICOMA will help you implement and integrate business processes with the latest technologies, such as the Power Platform, which consists of Power Apps, Power BI and Power Automate

2

We will help you with the use of Power Platform, which creates solutions in the form of low-code and uses ready-made connectors that can be directly connected to the system. This minimizes time and effort – for both development and implementation.

3

As part of this one-day event, we will introduce you to the implementation and possibilities of using the Power Platform. We will also deal with your questions.

ARICOMA Power Platform Consulting services

1 Day Implementation

Microsoft Power Platform provides a fast application environment, the automation of workflows, and expands the software solutions that you already use. With this solution you get exactly what you need for a quick response to the changing needs of your business - within days, at lower costs than standard software development.

We will show you how to specifically automate your manual, error-prone processes, and to release your resources. As a Gold Microsoft Partner, AUTOCONT has many competencies and expertise throughout the Microsoft technology suite.

We focus on the needs of customers in the digital transformation field. If you want to digitalize processes, but are unsure where and how to start, this service will help your organization to find the best processes that can be quickly and efficiently automated.

Our experienced consultants will introduce you to Power Platform technologies, along with their possibilities and best practices. Thanks to our experience from many projects in various industries, we also provide help with the implementation of the Microsoft Power Platform solution.
