

Microsoft Dynamics 365 roll-out projects

We will support Czech and Slovak branches of foreign companies with international Dynamics 365 implementations.

Continuing globalization has resulted in changes in the governance patterns of multinational companies, and in particular multinational companies operating worldwide. The management of such organizations in a rapidly changing world requires adequate support from information systems.

Microsoft Dynamics 365 unified system

Such support is difficult to provide at multinational level through inhomogeneous information systems composed of local subsystems. Moving to a single Dynamics 365 global information system greatly simplifies operations and reduces system administration costs. In addition to the harmonization of system processes and data across countries, international organizations must also keep in mind compliance with local regulations in all countries where they operate.

International implementation partner for the Czech Republic and Slovakia

AUTOCONT is your strong partner for international projects in the field of implementation and rollout of Microsoft Dynamics 365 information systems. Our procedures are based on Microsoft implementation standards and many years of experience with international Dynamics projects at our customers. In addition to implementation services and support to our customers in the Czech Republic and Slovakia, we offer our proven solutions for managing local legislative requirements in both countries.

Activities at the international Dynamics 365 roll-out

- Cooperation with a global implementation partner
- Receiving knowledge of the implemented global solution and transferring it to the customer's local branch
- Deployment of local regulations and legislation rules
- Check of Dynamics parameterization and setup
- Collaboration on data migration
- Training of local users
- The possibility of developing minor local adjustments in accordance with the global solution
- Support for users at the branch office during verification and go-live operation
- Subsequent service support of the entire solution for the local customer

Benefits for the partner

- One supplier for the Czech Republic and Slovakia
- Ready-made packages to cover local legislative requirements of both countries
- Language skilled D365 specialists (primarily in English)

Benefits for the customer
