

Simplify managing corporate and BYOD devices

Enterprise Mobility

Business Benefits

Protect your corporate data with secure connections between people, devices and apps.

Simplify device management with a flexible and unified mobile device management solution.

Empower users to be more productive wherever they are working on any device.

Enterprise Mobility solutions can help protect your organization from threats, make it easy for your users to work from any device, and simplify the complexity of managing different types of devices.

Empower your users to work from anywhere

Avaleris can provide a full range of consulting services to ensure that your organization's IT team is best positioned to securely deploy and manage different types of devices – Corporate vs. BYOD or iOS vs. Android – using the following Microsoft technologies:

- InTune
- Windows AutoPilot
- Endpoint Manager

Accelerate your Enterprise Mobility journey with an Interactive Briefing

Every organization has unique requirements. Avaleris' Interactive Briefing will help you understand how the latest Microsoft technologies can improve your Enterprise Mobility infrastructure and quickly provide you with high-level recommendations based on your current and future requirements.

1. "Technology Overview"

Allow us to present the latest Microsoft technologies and features and to demonstrate how they can assist your organization.

2. "Assessment"

Provide us with a current state and future requirements so that we can best determine the right next step.

3. "Recommendations"

Receive a set of high-level recommendations and prioritized next steps to guide your Enterprise Mobility journey.

WE'RE READY TO HELP

Avaleris offers a full range of solutions to help continue your Enterprise Mobility journey and position your organization for success.

- Consulting and Advisory Services
- Security Strategies and Assessments
- Solution Design and Deployment
- Operationalization
- Adoption & Change Management
