

Delight your partners and customers with secure access

External Identity & Access Management

Business Benefits

Secure access for external users with multi-factor authentication and conditional access.

Improve the user experience by going password-less, using self-service password resets and/or single sign-on.

Onboard external users to your applications quickly and easily.

The right foundation for External Identity & Access Management (EIAM) can help protect your organization from threats and makes it easy to onboard your partners and customers.

Deliver an amazing user experience

Avaleris can provide a full range of consulting services to ensure that your organization's corporate data can be access quickly and easily by authorized users using the following Microsoft technologies:

- Azure Active Directory B2B
- Azure Active Directory B2C

Accelerate your EIAM journey with an Interactive Briefing

Every organization has unique requirements. Avaleris' Interactive Briefing will help you understand how the latest Microsoft technologies can improve your External Identity infrastructure and quickly provide you with high-level recommendations based on your current and future requirements.

1. "Technology Overview"

Allow us to present the latest Microsoft technologies and features and to demonstrate how they can assist your organization.

2. "Assessment"

Provide us with a current state and future requirements so that we can best determine the right next step.

3. "Recommendations"

Receive a set of high-level recommendations and prioritized next steps to guide your EIAM journey.

WE'RE READY TO HELP

Avaleris offers a full range of solutions to help continue your EIAM journey and position your organization for success.

- Consulting and Advisory Services
- Security Strategies and Assessments
- Solution Design and Deployment
- Operationalization
- Adoption & Change Management
- Managed Services
- Microsoft-funded Accelerator Workshop*
