

Safeguard your corporate data

Information Protection

Business Benefits

Protect sensitive data everywhere, even in motion and when shared.

Gain visibility and control over how any file is being used with a comprehensive and integrated solution.

Understand how your cloud apps are being used and manage Shadow IT.

Information Protection solutions can help protect your organization from data breaches and make it easy for your users to classify sensitive information.

Protect sensitive data everywhere

Avaleris can provide a full range of consulting services to ensure that your organization's corporate data is protected no matter where it goes using the following Microsoft technologies:

- Microsoft Information Protection
- M365 Data Loss Prevention
- Cloud App Security
- Windows Information Protection
- BitLocker

Accelerate your Information Protection journey with an Interactive Briefing

Every organization has unique requirements. Avaleris' Interactive Briefing will help you understand how the latest Microsoft technologies can improve your Information Protection posture and quickly provide you with high-level recommendations based on your current and future requirements.

1. "Technology Overview"

Allow us to present the latest Microsoft technologies and features and to demonstrate how they can assist your organization.

2. "Assessment"

Provide us with a current state and future requirements so that we can best determine the right next step.

3. "Recommendations"

Receive a set of high-level recommendations and prioritized next steps to guide your Information Protection journey.
