Avaleris

Achieve Threat Protection Compliance

Business Benefits

- Understand which Security Directives you meet and which ones you do not.

- Develop a holistic plan to address new requirements quickly and cost-effectively.

- Learn how Microsoft 365 and Azure technologies can address each Security Directive.

In order to enhance security posture and comply with recent Security Directive 14 issued by the Quebec Ministry of Education that pertains to Threat Protection, educational institutions in Quebec require a holistic approach to monitoring, detecting and responding to cyber threats and security incidents.

Detect, Investigate and Respond to threats

Avaleris has developed a Capability Maturity Model that will help you assess your Threat Protection capabilities to ensure you can monitor and detect threats and have an appropriate Incident Response Plan in place that includes how to respond to Ransom Attacks. The following Microsoft technologies can be deployed to help your organization achieve compliance.

- Azure Sentinel
- Azure Active Directory Access Reviews
- Microsoft Advanced Threat Protection
- Microsoft Cloud App Security

Accelerate Compliance with a Threat Protection Assessment

Every institution has unique requirements. Avaleris has developed an Assessment framework that will help you understand what is missing in order to achieve compliance with the Quebec Ministry of Education Security Directives. In addition, this assessment will demonstrate how the latest Microsoft technologies can improve your security infrastructure and quickly provide you with high-level recommendations based on your current and future requirements.

1. "Gap Analysis"

Allow us to perform a maturity assessment in each of the relevant security areas to determine your current state and identify required improvements.
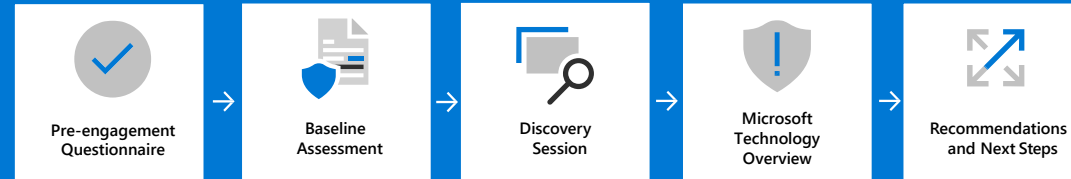

2. "Technology Overview"

Allow us to provide you with an overview of how Microsoft 365 and Azure technologies can help you address the required areas to achieve compliance.

3. "Recommendations"

Receive a set of high-level recommendations and prioritized next steps to guide your deployment planning.

OUR APPROACH

Our approach to assessing compliance with Ministry of Education Security Directives

| Pre-engagement Questionnaire | → | Baseline Assessment | → | Discovery Session | → | Microsoft Technology Overview | → | Recommendations and Next Steps |

Avaleris has worked with more than 50 Education Institutions across Canada

UNIVERSITÉ Concordia UNIVERSITY
