

Achieve Compliance

Business Benefits

Understand which Security Directives you meet and which ones you do not.

Develop a holistic plan to address new requirements quickly and cost-effectively.

Learn how Microsoft 365 and Azure technologies can address each Security Directive.

In order to comply with the recent Security Directives issued by the Quebec Ministry of Education, educational institutions in Quebec require a holistic approach to planning and deploying a variety of security technologies.

Establish a holistic plan

Avaleris has developed a Gap Analysis framework that will help you assess how your current security technologies address the Security Directives as well as identify any shortcomings. Microsoft 365 and Azure technologies can be deployed to address the Security Directives in the following security areas:

- Multi-factor Authentication
- Device Management
- Information Protection
- Data Loss Prevention
- Identity & Access Management
- Privileged Access Management
- Threat Protection

Accelerate compliance with a Gap Analysis Assessment

Every institution has unique requirements. Avaleris has developed a Gap Analysis Assessment framework that will help you understand what is missing in order to achieve compliance with the Quebec Ministry of Education Security Directives. In addition, this assessment will demonstrate how the latest Microsoft technologies can improve your security infrastructure and quickly provide you with high-level recommendations based on your current and future requirements.

1. "Gap Analysis"

Allow us to perform a maturity assessment in each of the relevant security areas to determine your current state and identify required improvements.

2. "Technology Overview"

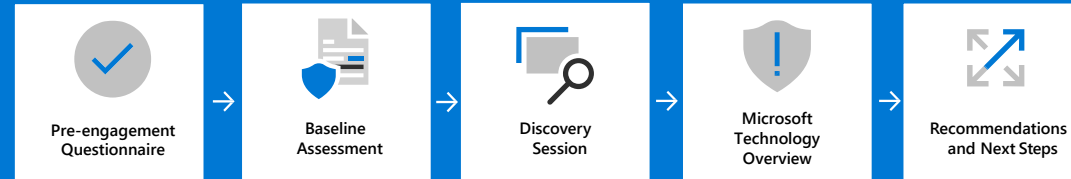

Allow us to provide you with an overview of how Microsoft 365 and Azure technologies can help you address the required areas to achieve compliance.

3. "Recommendations"

Receive a set of high-level recommendations and prioritized next steps to guide your deployment planning.

OUR APPROACH

Our approach to assessing compliance with Ministry of Education Security Directives

Avaleris has worked with more than 50 Education Institutions across Canada

HEC MONTRÉAL
