

Avanade Data Security FY24

Organizations are rethinking how to manage data and strengthen security. As your business-critical data expands and your workforce shifts to remote/hybrid work, having an integrated security approach to migrating and controlling privacy and regulatory risks is more important than ever.

Secure sensitive business information that enterprises share within and outside the company

Business Needs

An explosion of data which requires protection & governance across platforms to protect against data loss or leakage

Clients need to understand what data they have, what needs to be secured and how to address emerging compliance requirements.

With rising cyberattack incidents C-level suites are concerned around managing their organization's data and their customers privacy

Value Proposition

We know how to manage and use data in a secure way, cost effectively and in the context of actual regulations helping clients understand what data they have and how to protect & govern their data.

- Risk reduction with increased **threat** protection which detects and prevents data loss, data leakage and unauthorized data transfer.
- Guide towards addressing compliance requirements fostering safe and compliant communications.
- Drive cost and service optimization by leveraging the capabilities of the Microsoft platform replacing point solutions where opportunity arises.

Business offering summary

What is it?	Action / Activity	Typical outcomes
