Why Avanade?

Customers trust us

Avanade is the leading provider of innovative digital and cloud services, business solutions and designed experiences delivered through the power of people and the Microsoft ecosystem.

Do what matters

Avanade is the global market leader in building innovative Microsoft solutions

As a joint venture, formed in 2000 by Accenture and Microsoft, Avanade brings the best in Microsoft capabilities. With unique industry insights, unrivaled expertise and breadth of services, our 60,000 people do what matters for our clients and their customers every day.

60,000

Skilled and diverse professionals
– 29% of whom are women

60,000+

Microsoft certifications, more
than any other partner

82

Locations across **26** countries

10,000

Projects with **4,000+** global
clients since inception

Empower your organization with low-code

How Microsoft Power Platform can adapt and enhance your existing strategy

Microsoft Power Platform overview

Microsoft Dataverse

Maximize your data's potential with a low-code platform that secures and manages apps, workflows and AI-powered tools.

Security and governance

Harness enterprise-grade compliance and governance to seamlessly manage, monitor and secure your low-code investments.

Connectors

Seamlessly connect data across your applications, with over 1000 Power Platform connectors available to help your makers create unified solutions.

Why choose Power Platform?

Innovate inside a cloud ecosystem

Maximize your impact and drive new possibilities by augmenting your existing low-code tools and connecting your solutions to Microsoft Fabric, Azure, Microsoft 365 and Dynamics 365

Build enterprise-grade solutions

Increase productivity and collaboration by empowering your developers to create innovative, scalable solutions at speed.

Improve efficiency with AI capabilities

Use AI tools to accelerate app development, automate workflows, visualize data and reduce repetitive tasks.

Enhance intelligent chat experiences

Improve employee and customer experiences while optimizing business processes using conversational AI.

A comprehensive partnership to support your Microsoft Power Platform adoption and a value realization journey

With Avanade, you can access Power Platform's benefits through four distinct phases that strengthen your security, empower your people and grow your organization.

AI and low-code are empowering teams and driving greater business value

Unlock innovation and AI at speed

- Automate complex processes, reducing errors by 27% and time spent on manual tasks by up to 55%
- Empower everyone to innovate with connected data, integrations and scalable AI
- Leverage cross-team innovation to harvest high-value solutions
- Enhance agility, speed to market and innovation efficiency

Maximize value and accelerate delivery

- Boost efficiency with 50% faster app delivery and 206% ROI on Power Platform
- Enable business users to solve problems, build solutions and maximize technology investments faster
- Strengthen relationships between IT and the wider organization
- Improve IT ROI, issue resolution speed and mitigate shadow IT risks

Drive efficiency and agility affordably

- Accelerate delivery by up to 50% for internal and external solutions with low-code building blocks and connectors
- Optimize business operations with AI and increase profitability
- Align resources to increase operational efficiencies and lower operational costs
- Reduce overhead with an as-a-Service approach to maintenance and updates

What's standing in your way of success?

With the right plan, you can bring your low-code and AI ambitions to life

Unlocking low-code's true business value

- Lacking confidence to successfully roll out and scale low-code platforms
- Unsure how to quantify the business impact of low-code
- Slow delivery with growing backlogs
- Unclear how to utilize guardrails and internal governance to ensure low-code and AI successfully integrate

Facing a lack of efficiency and automation

- It's unclear how low-code can find and solve automation opportunities
- Inefficient, error-prone manual processes are expensive and complex to automate and integrate

Struggling to get the right ROI from IT

- Budgets are tied up in maintenance, integrations and technical resources
- It's hard to demonstrate ROI from technology investments or reduce technical debt to secure additional budget

Navigating the cost and speed of innovation

- Overheads, technical debt, siloes and dependencies make it difficult to respond to business needs
- We need faster innovation to accelerate internal solution delivery and time to market
- Our teams require a simple way to get started with AI and low-code solutions

Dealing with a lack of IT visibility and control

- Shadow IT is happening around the organization, but we can't see it or control it
- Data isn't under full control
- IT doesn't have insight into business needs and problems users are trying to solve independently

Get started with our Low-code Governance with AI Evaluation

Gain a strategic foundation and direction for governance and operations, with an actionable plan for deployment, successful adaption and scaling

Plotting your path

Join us for an interactive, 2-week engagement. Together, we'll collaborate to understand your challenges, establish your goals and provide:

- An aligned governance vision to guide Low-Code/No-Code (LCNC) and AI adoption
- A tailored operations model, ensuring secure and scalable deployments
- A defined enablement approach for Pro-Dev and Citizen Dev teams
- Guidance for supporting makers through community, upskilling and promotion
- Solution patterns and value framework, highlighting high-impact use cases
- A clear roadmap with next steps and recommended best practices to ensure fast, confident scaling
