How can we help?

The Avanade Security Risk Assessment

Our 5-day risk assessment offers CIOs and security leaders a comprehensive view of risk posture across their enterprise and proactive ways to protect their organizations from growing cyber threats like ransomware, insider threats and vulnerabilities like Log4j.
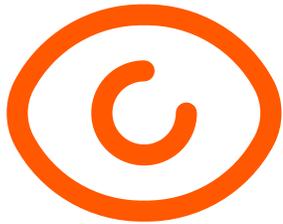

Assesses key risk vectors as well as cyber hygiene metrics and compensating controls.

Investigate and identify threats in real-time

Generates comprehensive report with prescriptive remediation and implementation plan.

Avanade Security Risk Assessment

Getting Started – A Three Step Approach

Indicative duration 5 days

Step 1: Pre-Execution: Customer/prospect environment preparation/creation
Step 2: Execution: Assessment setup and run
Step 3: Post-Execution: Data collection and document creation
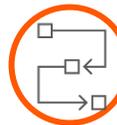

Solution

Identification of technical resources to complete pre-requisites

Software Deployed:

Tanium Cloud POC environment

Microsoft Defender for Endpoint Health dashboard

Activities

- Conduct a pre-assessment call to discuss expectations and requirements
- Set up Tanium Cloud POC environment
- Identify technical resources to complete pre-requisites with a focus on IdP / Clients / Firewall Rules (if needed) / AV Exclusions / VPN Subnet
- Configure the Tanium platform for the assessment and deploy the Tanium client on all relevant endpoints in the environment.
- Export data from the Tanium platform and create the Risk Assessment report.
- Present the assessment to key stakeholders within the customer/prospect.

Outcomes

- Team runs an executive workshop to deliver findings (written report) and discuss conclusions and recommendations
- Both Executive summary and detailed report can be used to initiate follow on projects
