# Powering Responsible AI governance

+ In collaboration with a leading US academic medical center, Accenture and Microsoft, Avanade has developed the **Smart AI Governance Engine (SAIGE)**.

SAIGE is a first-of-its-kind healthcare-specific AI governance platform leveraging the power of the Microsoft ecosystem.

# Avanade's Smart AI Governance Engine (SAIGE)

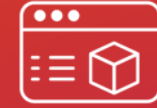

SAIGE is a healthcare-focused Responsible AI platform that digitizes **registration**, **evaluation**, and **tracking** of AI solutions for healthcare organizations.

SAIGE allows for **governance** and **transparency** by efficiently registering AI models through a standardized process, automating risk monitoring and streamlining vendor collaboration.

# Avanade's Smart AI Governance Engine

Powering Responsible AI governance

## Business Need

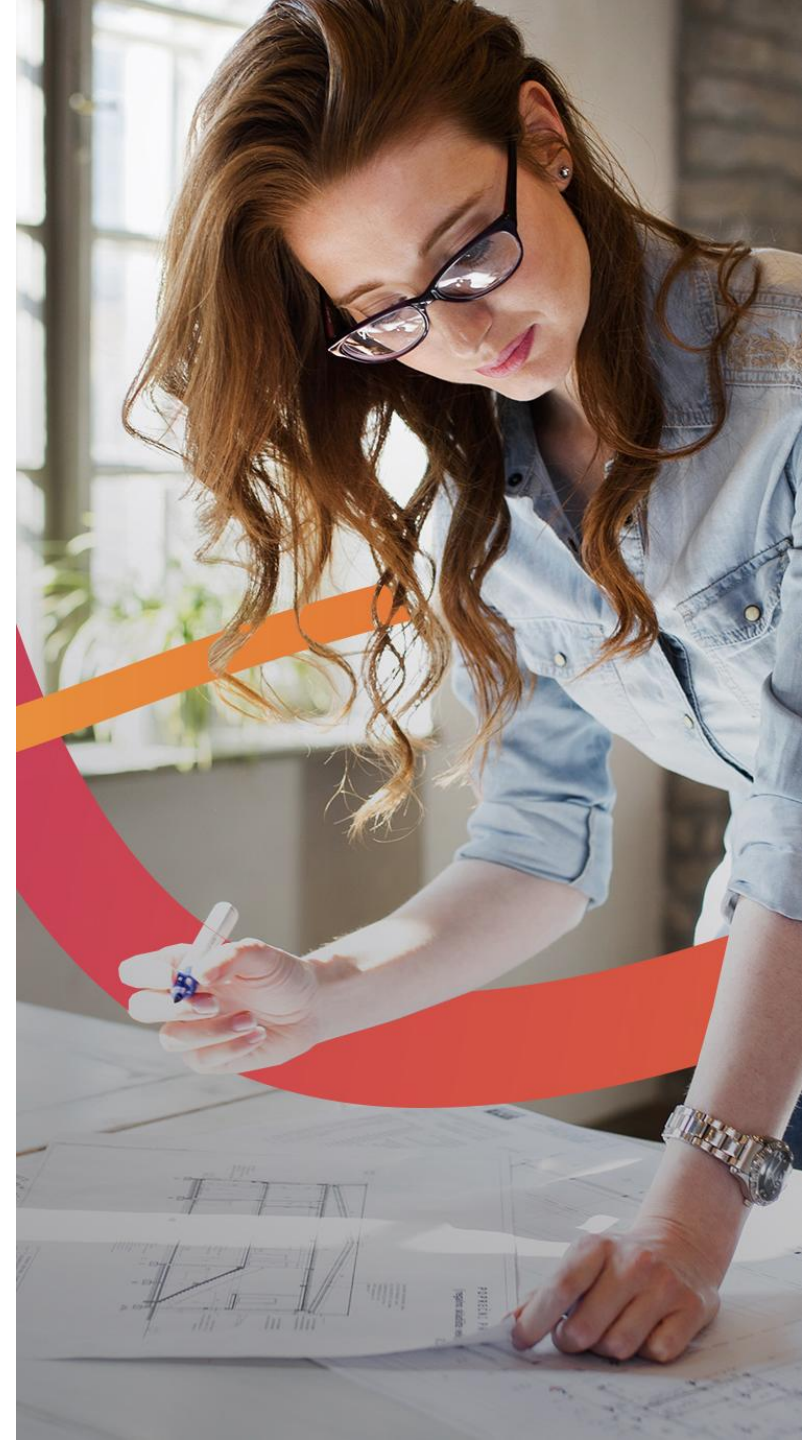

- **Understanding AI Inventory:** Organizations struggle with knowing what AI is deployed and where within their organization.
- **Centralizing and Tracking AI Governance:** There is no centralized healthcare specific AI governance platform to easily track models.
- **Developer Organization Collaboration:** Difficult to obtain technology information from organizations and vendors.

## Value Proposition

- **Register & Track AI:** Digitized workflow for registering and tracking AI models.
- **AI Inventory:** Centralized organizational AI inventory.
- **Governance:** Standardized governance, enabling AI registries.
- **Marketplace:** Sharing, testing, and purchasing AI.
- **Security:** Low barrier to entry through Entra ID.

## Approach

- **Digitized Governance Workflows:** Streamlines governance and inventory management.
- **Platform Analytics & Dashboards:** Provides real-time insights into AI deployment.
- **Process Automation:** Automates key business processes to enhance efficiency and reduce manual effort.

# Avanade SAIGE offering, our value proposition

- Register & Track AI Algorithms

- Leverage a digitized and automated workflow
- Anticipate the needs of future regulatory requirements.

- Marketplace / Collaboration:

- View, sell/share, test (locally or through Assurance Labs).
- Purchase AI algorithms & models from a national marketplace.

- AI Inventory Maintenance

- Maintain your AI inventory in one place.
- Fast access to status, performance, and KPI reporting.

- Security

- Leverage your existing enterprise identity; Entra ID for authentication.
- Built, run, and managed within the Microsoft Azure platform.
- No PII/PHI/ePHI/Financial data or code or any information designated as confidential is housed in SAIGE.

- Governance & Outcomes

- Standardize and scale your own governance process.
- Leverage Duke Health's built-in ABCDS methodology.
- Enable local registries of health AI technologies.
