

# Avanade D365 F&SCM Migration Services

# Setting the Context – Migrating to D365 F&SCM

## Challenges

### REDUCED FLEXIBILITY

- Stagnant and not designed to evolve, accommodate and respond to new industry trends and behaviors

### SECURITY

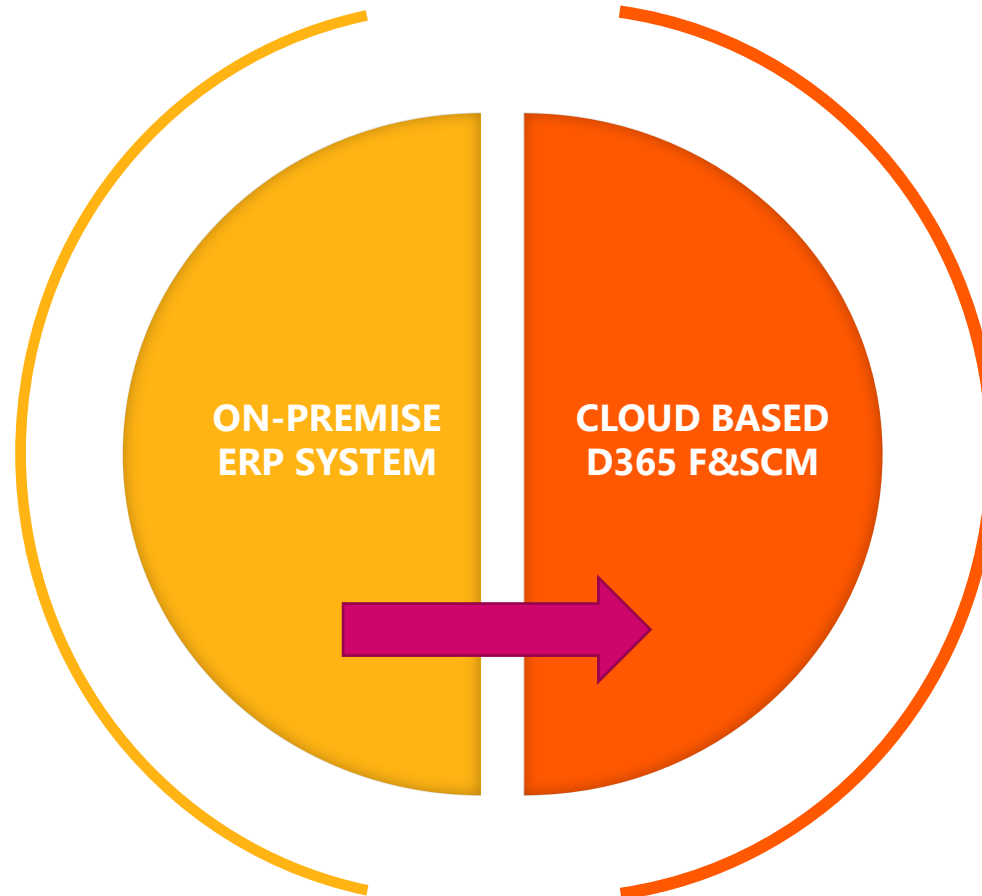

- More prone to human error and costly security breaches

### END OF SUPPORT

- Microsoft support for on-premise based Dynamics AX solution has already ended

### HIGH MAINTAINANCE

- Customized and difficult to update, resulting in high maintenance costs

## Opportunities

### SCALABILITY & GROWTH

- Flexibility to scale solution as per Microsoft roadmap and leverage power of Microsoft futuristic solutions.

### IMPROVED SECURITY

- Greater client trust in new CDP, global compliance requests and cost-effective disaster recovery options

### CROSS PLATFORM SUPPORT

- Run on any device (PC, tablet, phone), any platform (Windows, Mac, etc.), and any browser (IE, Chrome, Safari, Firefox etc.)

### EVERGREEN UPDATES

- Stay up to date with latest One version product updates from Microsoft

# Solution Overview

Applied experience, lessons learned, dedicated migration experts and automated tools

## CONSULTING SUPPORT

**Migration Studio** with technology and upgrade specialists to plan, execute and 'de-risk' the journey

## QUICK ANALYSIS & ESTIMATES

**Automatic scan** of existing code to understand the **complexity** involved and detect potential **conflicts**

## CODE MIGRATION

**Intelligent Upgrade Engine** to adopt best practices with quality output and lower costs

## DATA MIGRATION

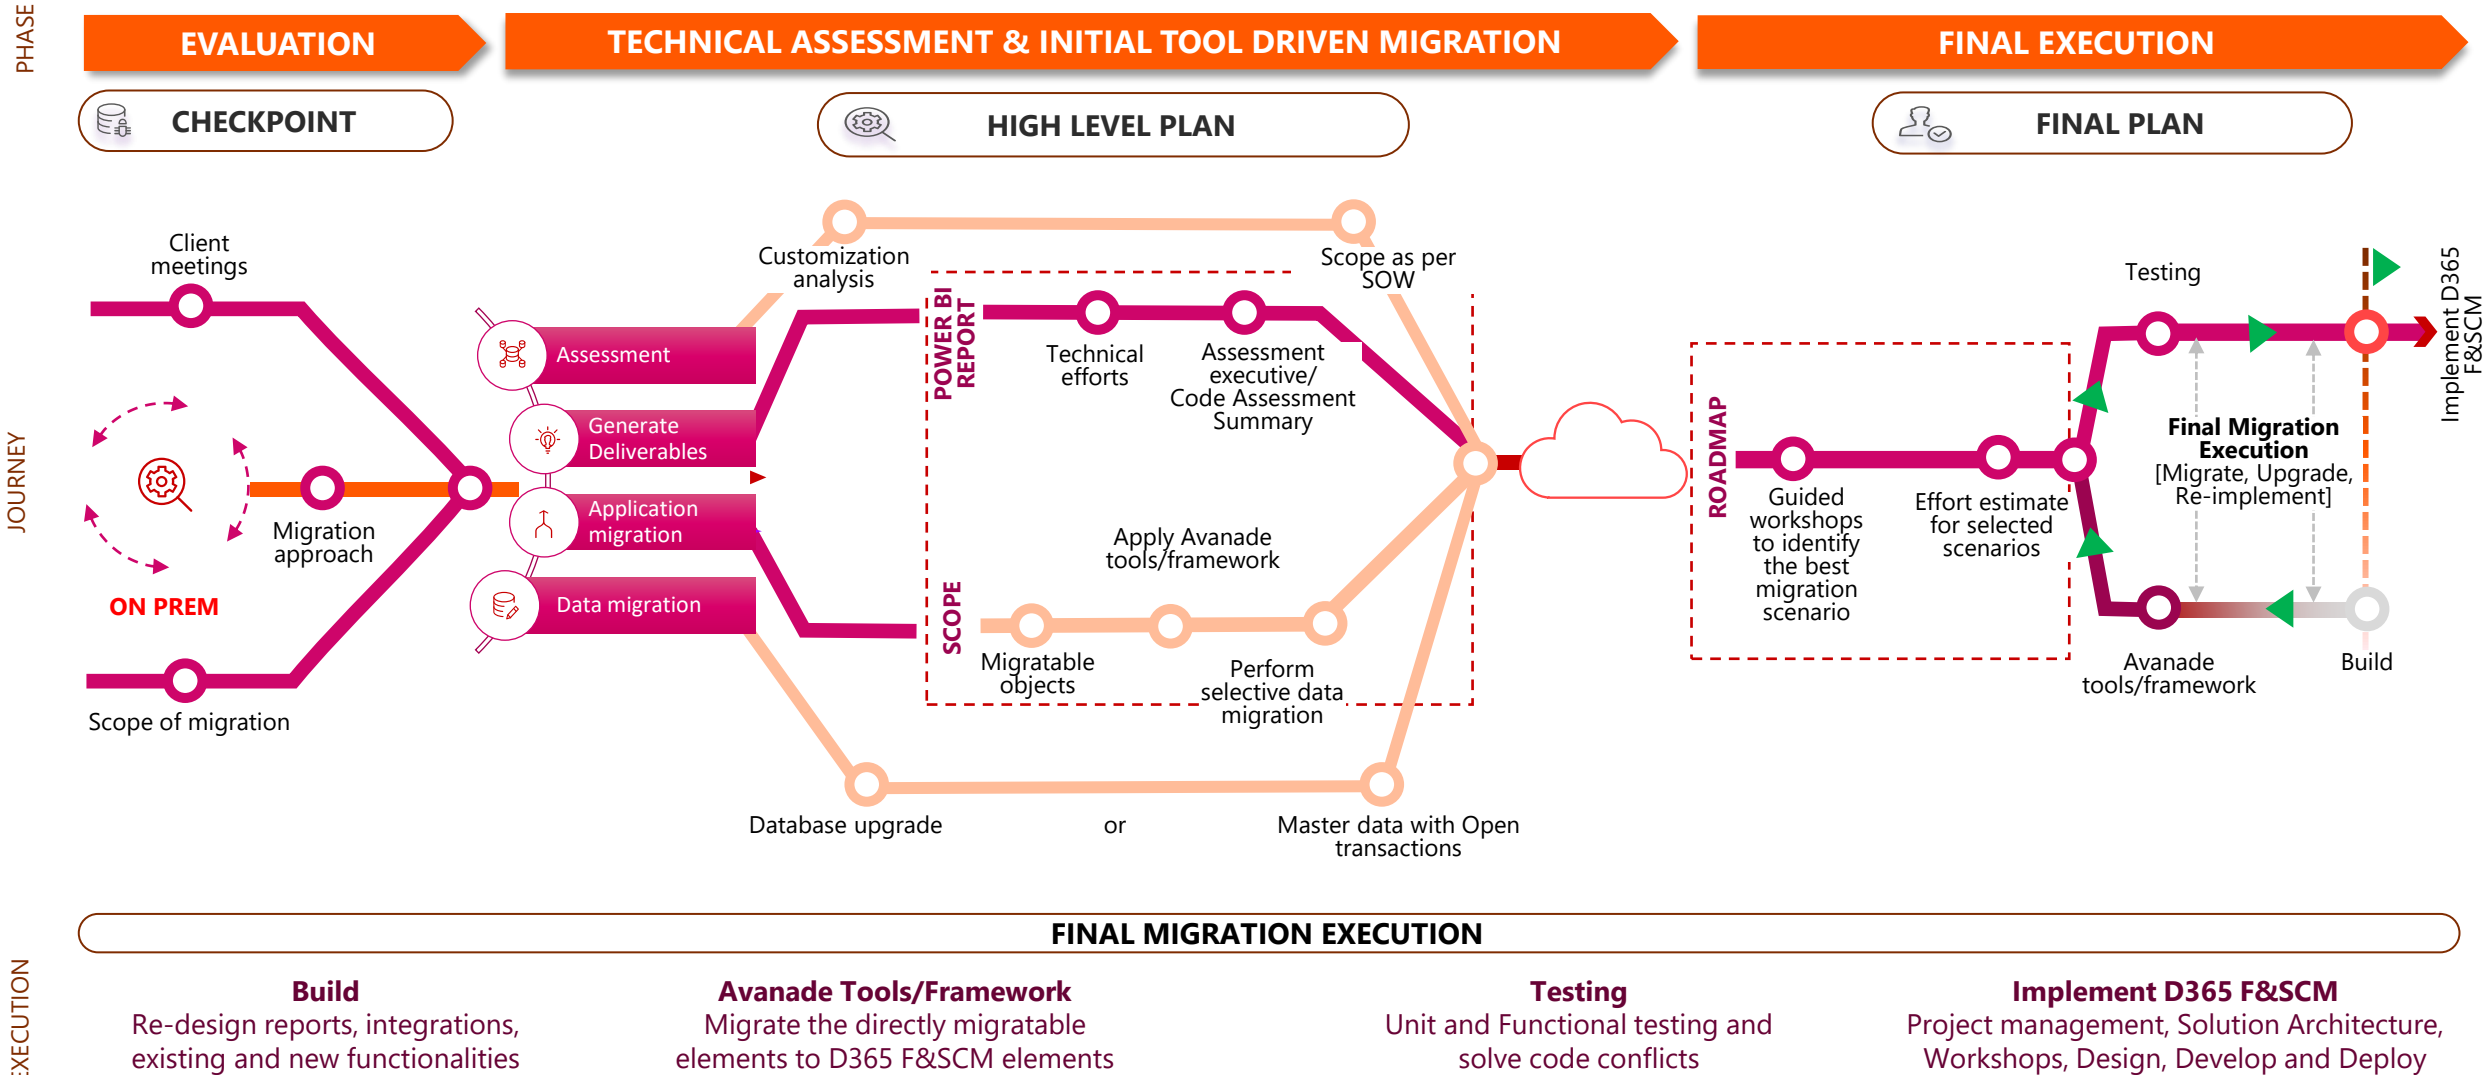

**Migration Experts** to drive master data migration and historic data upgrade activities

## REPORTS & INTEGRATIONS

**Certified experts** with a hands-on approach and provision of managed services

# Solution highlight : A structured migration approach

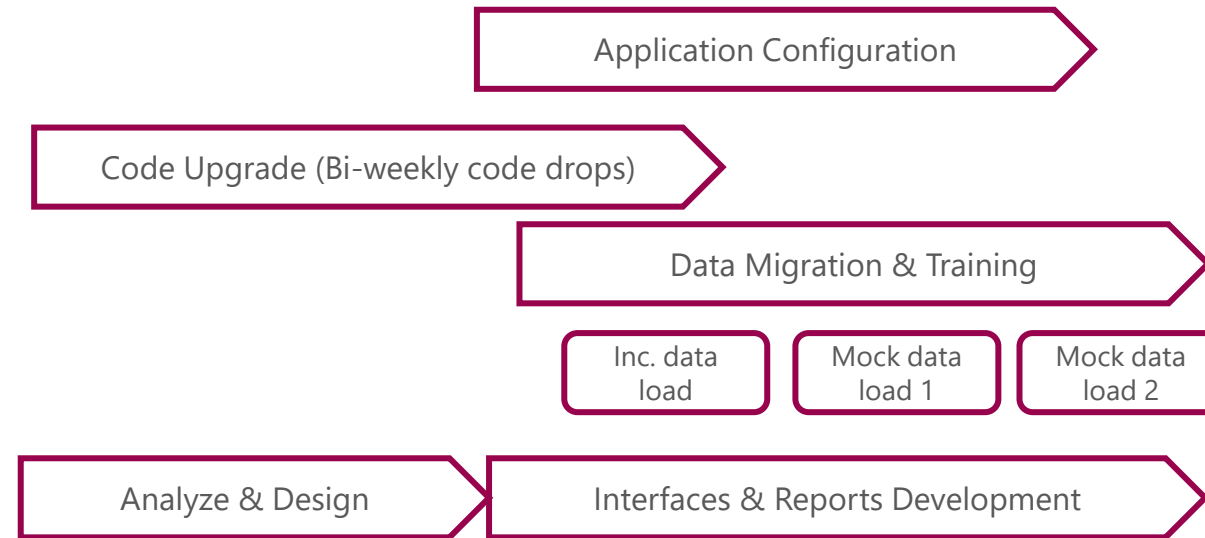

# Solution highlight : Differentiated, industrialized , accelerate at scale

## D365 F&SCM Migration Tracks

- 
**Code Migration**  
 Lift & Shift or Partial upgrade
- 
**Data Migration**  
 Master Data migration or Historic Database upgrade
- 
**Interfaces**  
 Build as per D365 F&SCM as per new framework
- 
**Reports**  
 Transition SSRS reports using Tool
- 
**Customized solutions**  
 Design and develop custom solutions
- 
**Data & Analytics**  
 Extending our D365 F&SCM solutions to Azure Data Platforms & Reporting

## Delivery Process Mechanism

### Release Management

**Continuous improvement, Agility, Responsiveness**

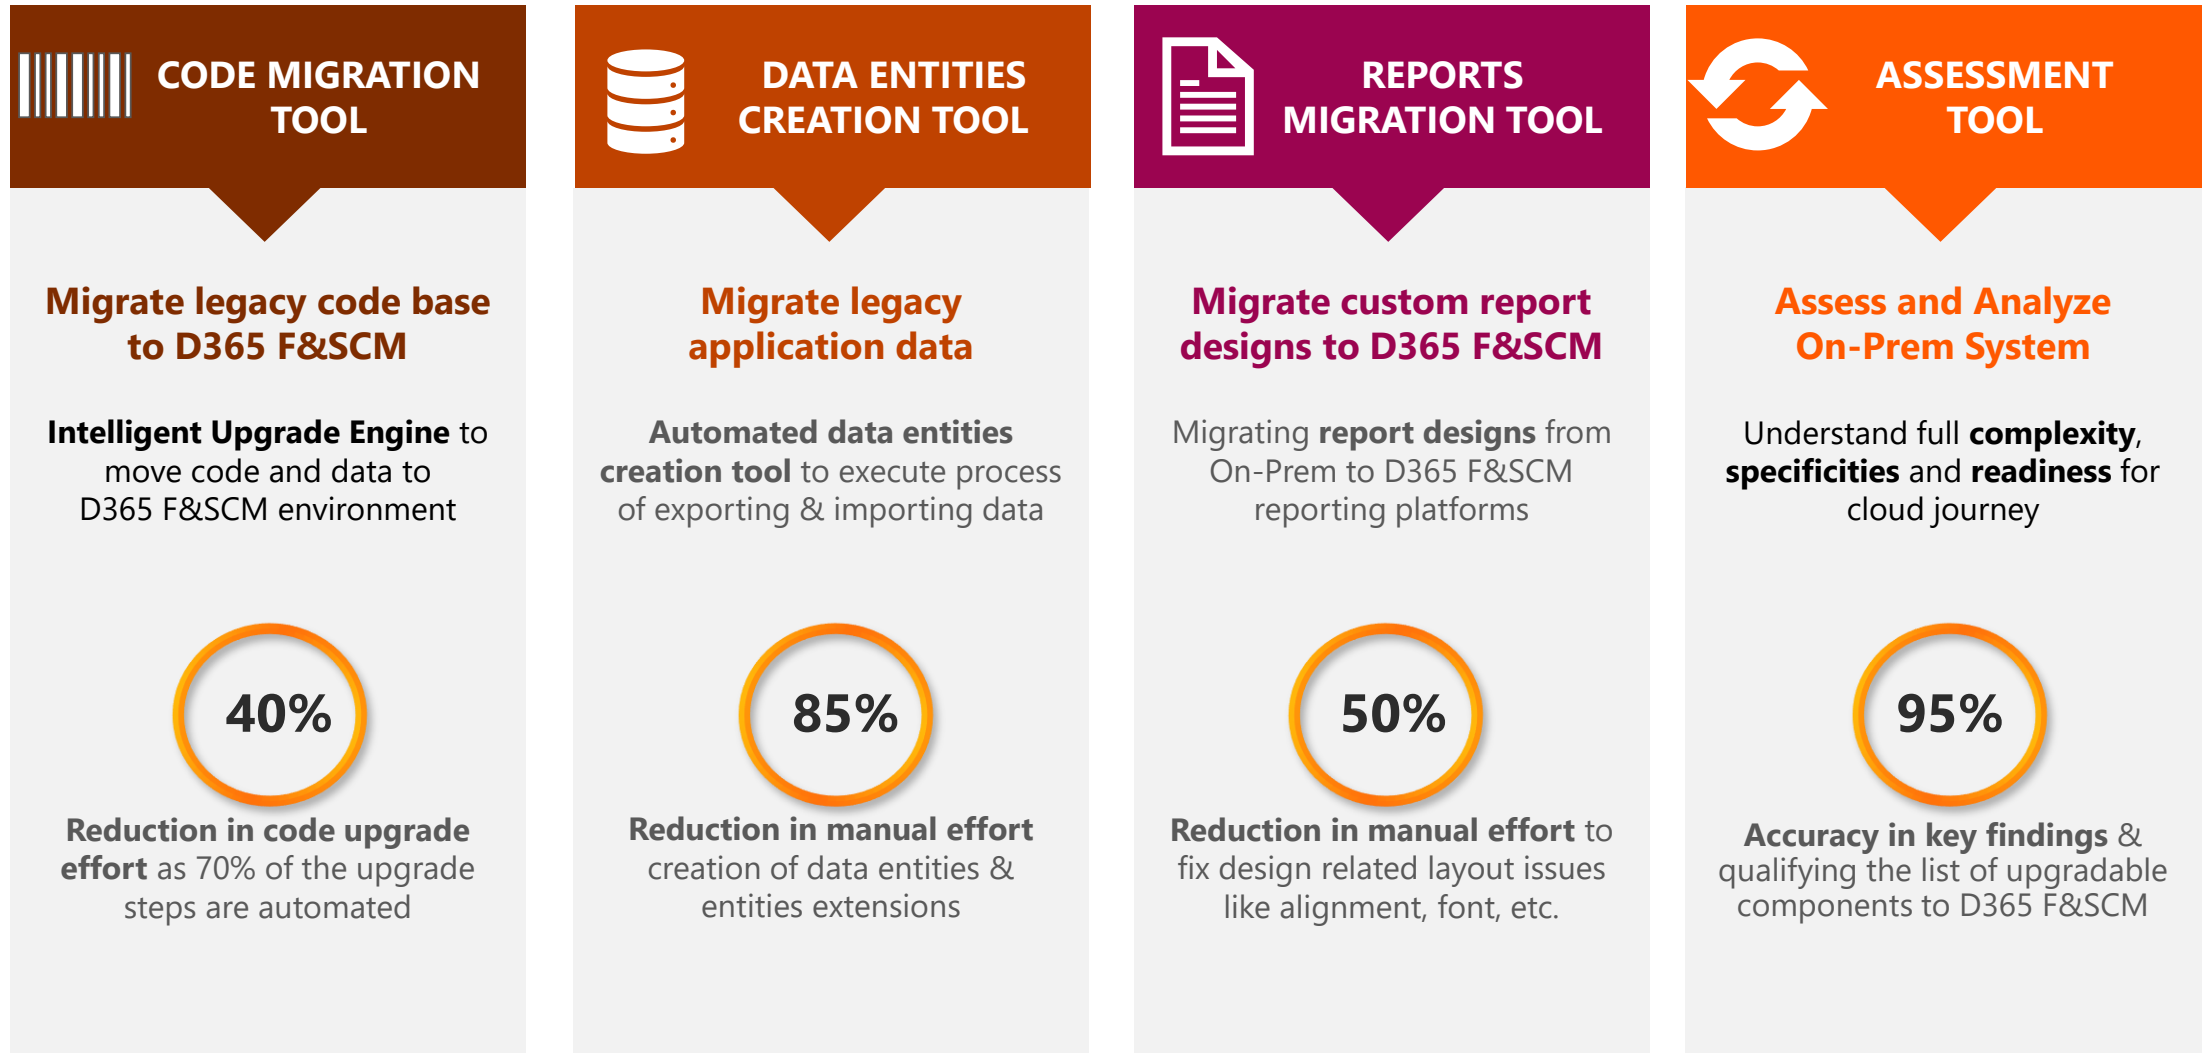

**Factory Governance, Reusable tools, Project Management**

## Business Outcomes

- 
**Optimized Processes**  
 Process optimizations around cash discounts, budgeting & forecasting
- 
**Saves time and cost**  
 Curated migrated approach & tools /frameworks that saves time and cost
- 
**Improved productivity**  
 Increased insights with dashboarding tools and reduced integrations with single data layer. Drill Down/Drill-Through provides quick access to right information

# Solution highlight: Tools & differentiators with an impact

## Avanade D365 F&SCM Migration Framework

# Solution highlight: Clear advantage

## D365 F&SCM MIGRATION

**Migration estimation**

Granular level with a detailed power BI report

**Supported upgrade path**

AX2009, AX2012 RTM, R2 and R3

**Selective objects upgrade**

Object, module or process wise upgrade path possible

**Intelligence**

Intelligently handle business logic component to adhere to D365 F&SCM standards and extensions

**Deprecated object comparison**

Possible

**Code conflict resolution**

Partial Automation

**Developer inputs**

Possible

## LCS ENGINE

High level reporting with abstract details

AX 2012 R2 and R3

Not Possible

Not Possible

Manual

Not Possible

# D365 Migration Studio - One-stop shop for D365 F&SCM solutions

## Core Services

CURATED MIGRATION  
APPROACH

INTELLIGENT  
TOOLSET

BEST PRACTICE  
ENABLEMENT

## Value Drivers

1. Intelligent Platform  
Upgrades

2. Functional  
Review

6. Guided  
Innovation  
Workshops

D365  
F&SCM

3. Technical  
Assessment  
Services

5. Pre-Sales &  
Solutioning

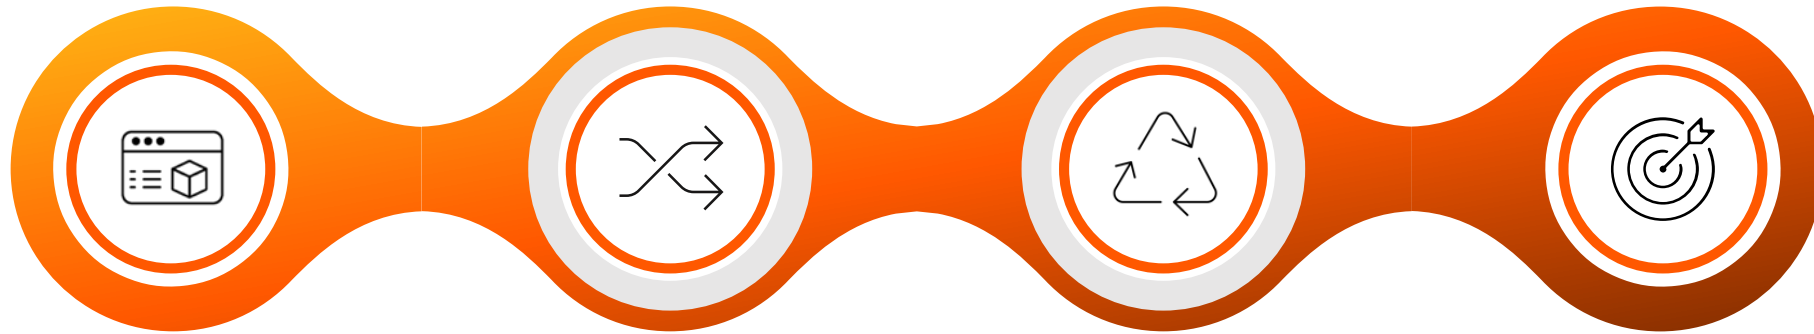

4. Tools and Framework

# Way Forward

Get Your Current On-Prem System Assessed

## Initiate

- Environment readiness
- Fetch client code base
- Framework Installation

## Execute

- Assessment execution and extract outcomes
- Advanced technical assessment frameworks

## Review

- Consolidate outcomes, BI report
- Provide estimates and approach for version upgrades

## Deliver

- Effective transition framework
- Provide staffing and pricing plans

Technical assessment activities – **2 Weeks**

# Thank You
