Do what matters

 Shape your AI vision

Imagine what you'll do when your people are supercharged by copilots

Microsoft 365 Copilot Change Enablement Accelerator

Microsoft 365 Copilot is poised to drive transformational change in the workplace, but this change cannot be achieved overnight.

Harnessing the full potential of Copilot depends on how well you engage and empower your employees to adopt new ways of working.

Our Microsoft 365 Copilot Change Enablement solution is designed to get you “People Ready” so you can realize the value of increased productivity, efficiency and creativity with Copilot

- ❑ Create a robust change strategy to ensure a clear understanding of change factors and purpose
- ❑ Identify the necessary skills, capabilities and training to build a new organizational design and strategic workforce
- ❑ Define a change network of champions to share the benefits of AI and build employee engagement
- ❑ Develop AI and data literacy principles to ensure a transparent and consistent perception and interpretation
- ❑ Create an action plan to drive effective governance and communication to share knowledge, increase engagement and build trust
- ❑ Map key stakeholders to help share the vision and purpose of your Copilot strategy

Why Avanade

Our "Learning and Insights"

We are one of only 10 who've been on the Copilot journey with Microsoft since February

Microsoft Partnership

Microsoft has captured the narrative on Generative AI and our position as No1 partner and our early involvement supporting development of Copilot positions us as a strong player and early mover in this space. Microsoft are keen for us to engage with EAP clients.

Microsoft Specialization

We have deep subject matter experts who can provide the capacity and skills to enable clients to move fast to adopt copilot by addressing problems as they are encountered

Our position as a Workplace innovator

Avanade's is an established market innovator for Future of Work where we support clients to realize the value of the Microsoft Workplace through Enhanced Employee Experiences and the Reinvention of Work for Business Value Outcomes.

This aligns with our Gartner Magic Quarter positioning.

We have a broader perspective and toolkit

With our Experience Studio innovation service our Advisory, Experience Design & Tech experts create the backlog and business case, guide development, introduction and adoption of new technology / solutions, and provide ongoing oversight and management of the solution, and insights on value realized. Copilot may only be part of the answer.

How Avanade can help

Get started with Microsoft 365 Copilot Change Enablement.

People are the key to the speed and scale of delivering the benefits of M365 Copilot, but they can also be your biggest challenge when it comes to adopting AI solutions.

Avanade can help you engage and empower your employees to adopt new ways of working with Copilot.

4 Week Advisory Engagement

Avanade will work with you to assess your people readiness to boost Copilot adoption, mitigate risk and accelerate value.

Our methodology provides a structured, flexible and people-first approach to organizational change that covers every stage from Proof of Value to full implementation, including strategy and stakeholder analysis, communication, alignment, training, support, measurement and transition.

Let's get started

Connect with us to get started on a 4-week advisory engagement. Together, we can help you develop a value-driven, people-first approach to adopting Copilot in the workplace.

To get started, contact: copilot@avanade.com
