Microsoft 365 Copilot Extensibility Accelerator

Information powers Copilot.

Did you know you can extend and enhance the value of Copilot across your organization with custom connectors and plugins?

Enhance the power of Copilot with custom connectors and plug-ins

Microsoft 365 Copilot is a powerful tool but it's only as good as the data and third-party systems it can access.

Avanade's Microsoft 365 Copilot Extensibility Accelerator helps you create and deploy custom extensions, unlocking access to more data and functionality.

Whether you want to add new features, improve user experience or integrate with other platforms, we can help you design and build extensions that suit your needs.

Why Avanade

Our "Learning and Insights"

We are one of only 10 who've been on the Copilot journey with Microsoft since February

Microsoft Partnership

Microsoft has captured the narrative on Generative AI and our position as No1 partner and our early involvement supporting development of Copilot positions us as a strong player and early mover in this space. Microsoft are keen for us to engage with EAP clients.

Microsoft Specialization

We have deep subject matter experts who can provide the capacity and skills to enable clients to move fast to adopt copilot by addressing problems as they are encountered

Our position as a Workplace innovator

Avanade's is an established market innovator for Future of Work where we support clients to realize the value of the Microsoft Workplace through Enhanced Employee Experiences and the Reinvention of Work for Business Value Outcomes.

This aligns with our Gartner Magic Quarter positioning.

We have a broader perspective and toolkit

With our Experience Studio innovation service our Advisory, Experience Design & Tech experts create the backlog and business case, guide development, introduction and adoption of new technology / solutions, and provide ongoing oversight and management of the solution, and insights on value realized. Copilot may only be part of the answer.

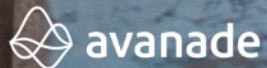

How Avanade can help

Get started with Microsoft 365 Copilot Extensibility Accelerator.

Developing extensions for Copilot requires Microsoft 365 technical expertise, as well as an understanding of the Copilot stack, extensibility options, security and performance requirements.

Avanade can help you prioritize the most valuable use cases for your business and test the feasibility and quality of the extensions, before deploying them.

1

Two-Hour Learn & Explore

Introduction to the Copilot extensibility framework and types of extensions available. Explore some examples of existing extensions and how they enhance the user experience and functionality of Copilot.

2

Two-Day Ideation Workshop

Understand your goals, challenges, and opportunities for extending your application with Copilot. Generate and prioritize ideas for extensions that align with your vision and business value.

3

4-Week MVP Development & Rapid Prototyping

Work with us to develop a minimum viable product (MVP) that demonstrates the functionality and feasibility of your extension.

OR

Avanade Productivity Studio

Ongoing innovation as a service that will help you build and develop a backlog of connectors and plugins that will enhance the Copilot user experience

Let's get started

Connect with us to schedule a two-hour 'Learn & Explore' session with our Generative AI specialists. Together, we can help you design and build extensions that enhance the value of Copilot for your people and organization.
