Modern Application Transformation
Be ready by design

Competition isn't what it used to be...

COSTCO WHOLESALE

The firm that sold the most cars in the US in 2018 isn't even a dealership
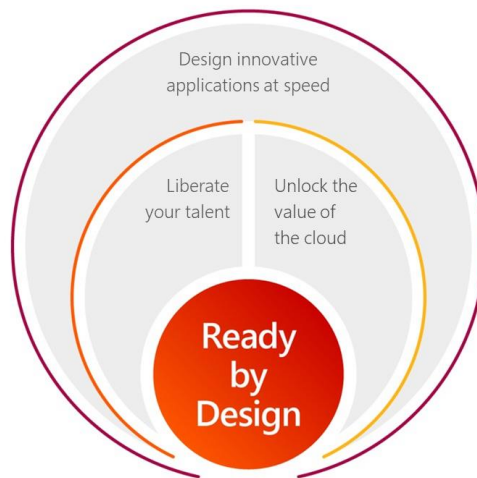

TESLA

Tesla is offering its own insurance

Marriott

A new division goes head-to-head with Airbnb

Disrupt the disrupters

Modern Application Transformation enables you to be ready by design to react to market changes in an instant. It's an approach that facilitates new business models by designing, delivering and optimizing agile, human-centered applications.

Design innovative applications at speed

Liberate your talent

Unlock the value of the cloud

Ready by Design

- Create new business models by designing innovative human-centered applications at speed

- Achieve faster time to market by liberating your talent to use proven agile and DevOps approaches for software product engineering

- Increase business agility by leveraging historical investments and securely unlocking the value of the Microsoft cloud

Forget about the box

Today's customers want differentiated experiences. And differentiated experiences require bespoke digital products and services.

Our **Modern Application Transformation** services are designed to help you envision, deliver and leverage bespoke digital products and experiences.

- Accelerate transformation
- Deliver new business and revenue models
- Foster agility in fast-changing markets
- Identify and solve business problems
- Deliver compelling user experiences

- Minimize risk, complexity and disruption
- Generate continuous value
- Enhance innovation, productivity and efficiency
- Continuously evolve, improve and innovate

Where are you on your transformation journey?

01

We **envision** change with smart digital product design and development.

02

We **unlock** change through decoupling, modernization and future-ready architecture.

03

We **drive** change through disciplined and continuous development, testing and release practices.

04

We **sustain** change by managing and evolving application portfolios, enabling you to adapt and scale up on demand.

We think and work differently

We're business integrators, not systems integrators. We believe that delivering applications on time, on spec and on budget isn't enough.

We formulate the right strategy to generate continuous business value from the products we create and manage.

Our approach fosters greater creativity, higher adoption rates, and more revenue and savings. And we generate value fast, and throughout the product lifecycle.

Expertise in modern engineering practices such as Agile and DevOps

Deep knowledge of the whole Microsoft ecosystem

Digital Innovation Studios with multidisciplinary teams worldwide

Specialist tools and IP to transition you to a new technology platform

Ability to continuously evolve and manage apps at scale

Wherever you are on your transformation journey, we can make you ready by design – fast.
