

Do what matters

# SharePoint Server End of Life

Workplace Experience

Expand Deck

# Change is here

The evolution of cloud marks a new era in how and where we work, and it's ushering in the next big wave of legacy technology extinction.

As of April 2023, Microsoft will no longer provide extended support for SharePoint 2013, and extended support for SharePoint Server 2016 and 2019 will end in July 2026.

It's critical to update your technologies as soon as possible or face the risks that come with using end-of-support products.

**It's time to migrate to SharePoint Online.**

# Plan ahead

**Most SharePoint migrations will take 12 to 18 months to complete.**

A delayed migration strategy could be costly. Planning ahead can help you avoid disruption across your entire organization.

**Do you have a plan?**

# Reimagine your collaboration strategy

**Migration should be more than a step up to the new version of SharePoint.**

**It's also a chance to elevate your employee experience.**

Our approach is to not only move you to SharePoint Online (SPO), but also to elevate your employee experience through our risk-free, complimentary, productivity-based managed service solutions.

With Avanade as your trusted partner, you can use this disruptive event as an opportunity to innovate and drive value for your business.

# An end-of-life SharePoint migration can redefine your employee experience and create tangible benefits for both your people and your business

## Improve the employee experience

Create a best-in-class employee experience that is personalized, easy to navigate, enables fast discovery of content and expertise, and serves the localized needs of a global employee base.

## Easily manage and publish content

Empower your organization's content owners to publish and maintain pages and content in your next-gen employee experience without reliance on vendors.

## Inspire new ways of working

Execute a compelling and meaningful change campaign to build advocacy and trust towards an evolving and dynamic digital culture.

When it comes to your employee experience, where does your organization need to focus its capability?

## Experience it everywhere

Whether your employees are in an office, on the road or on the manufacturing floor, provide them with a contextual and personalized experience that keeps them informed and connected to your culture.

## Socialize information across the organization

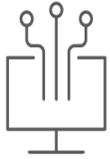

Seamlessly leverage social sharing to encourage content syndication across the broader community. Ignite engagement with the ability for employees to easily interact with each other from anywhere.

## Evergreen / cost of ownership

Let the platform work for you, from ever-evolving data and security updates to leveraging the latest in ever-changing technology.

# What you get with SharePoint Online

Take advantage of the latest features to drive business value and enhance productivity

## Integration with Teams

Empower teamwork with dynamic and productive team sites for every project team, department and division. Customize your site to streamline your team's work. Collaborate effortlessly and securely with team members.

## Power Platform Integration

Built on the Common Data Service for Apps (CDS), bring business analytics service, enterprise applications, robotic process automation and chatbot services into your SharePoint experience.

## OneDrive Sync Client

Synchronize SharePoint Online sites and content to your laptop. Update and create new content in your desktop folder and synchronize it up to SharePoint.

## Web Analytics

Web analytic reports analyze your site and site collection by leveraging usage data. With this SharePoint Online feature, you will not have to use numerous other tools and software for web analytics.

## M365 Security & Compliance

Leverage the capability of M365 security and compliance features consistently across your entire collaboration stack.

## Multi Geo capabilities

Leverage the Multi Geo capability of SharePoint and OneDrive to meet country/Region specific legal requirements for data at rest.

# Key considerations for your SharePoint modernization

We'll work together with you to envision a new digital hub. Our teams design, validate and test experiences with employees while we plan your content and change enablement strategy.

# How we approach migration to deliver better employee experience and enterprise capability

## From SharePoint 2013

### Capability

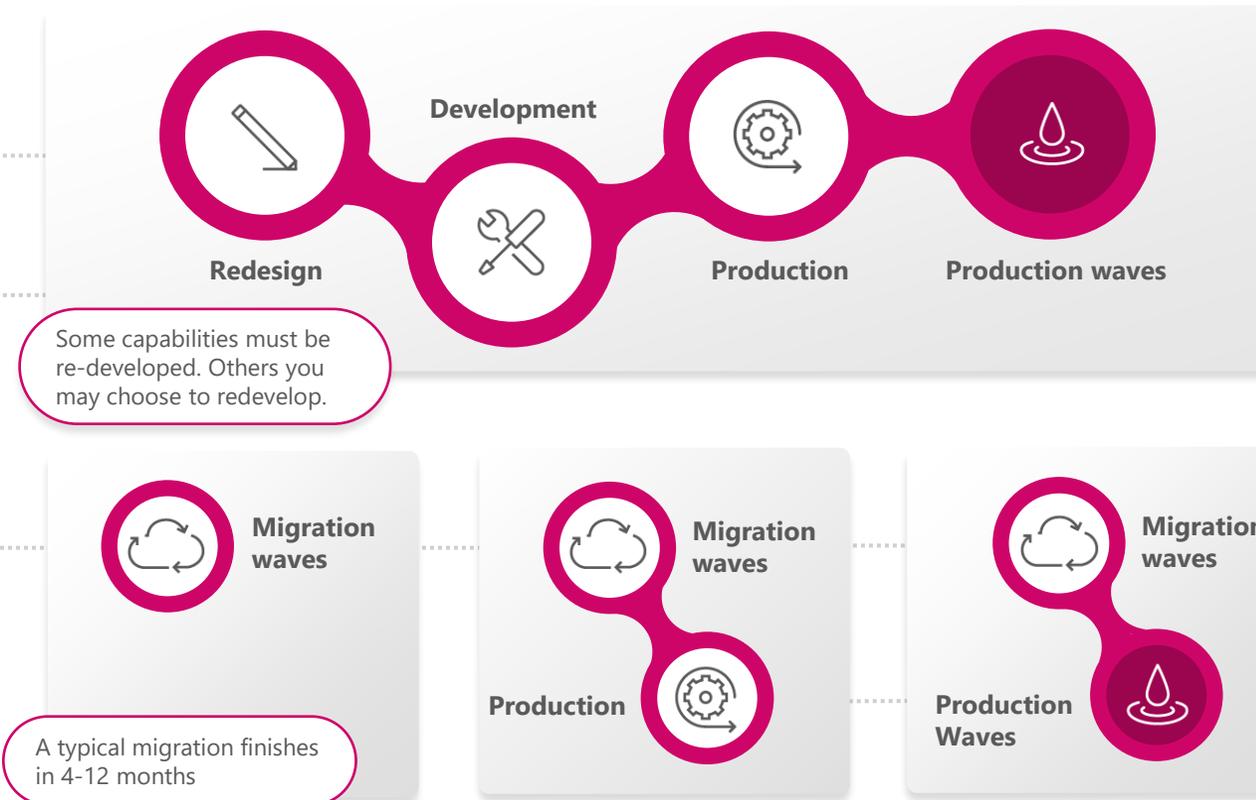

SharePoint on-prem capabilities that continue as-is in SPO

On-prem capabilities that will change (like InfoPath, workflows, .NET full trust solutions)

### Content and data

SharePoint 2013 on-prem content and data

## Through migration and transformation

## To SharePoint Online (SPO)

Capabilities that do not change in SPO

Capabilities that do change in SPO

Capabilities that are net-new in SPO

Content and data migrated to SPO

Modified and new content and data

Foundation — WX strategy & vision

Assessment, strategy, architecture, design, configuration and governance

Increase overall productivity with a **personalized, engaging and mobile-enabled experience**

Turn your intranet into a digital hub that helps your employees to **connect and collaborate**

**Rationalize content and applications** to boost effectiveness and cut costs

Accelerate the transformation of your **workplace experience**

# Value you can count on

**You know your business.**

**Avanade knows employee experience.**

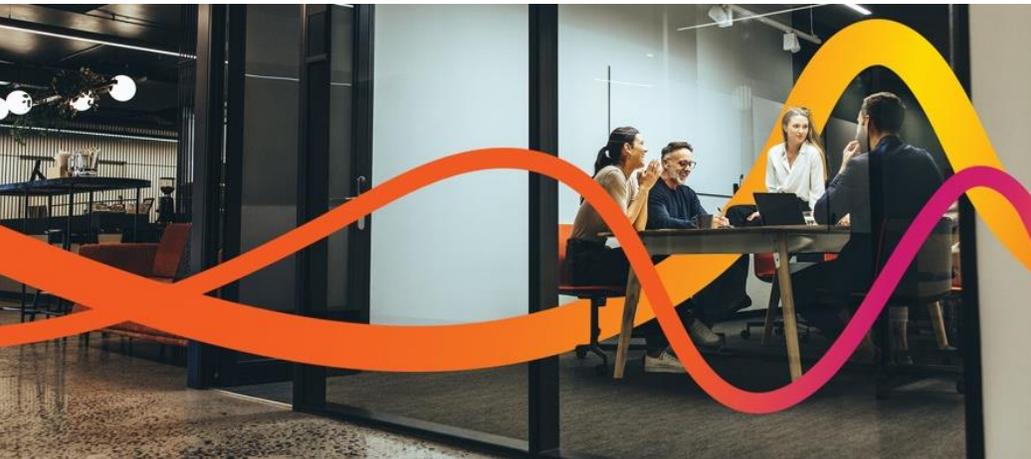

Your people are busy running your business.

Bring in the experts who have the capacity and skills to redefine your employee experience and create tangible benefits for both your people and your business.

# Transform your workplace experience with Productivity Studio

Avanade's Productivity Studio **empowers innovation and new ways of working** at speed and scale through a unique workplace transformation as a service model.

Our Experiences and Advisory teams will guide you through a series of design thinking sessions so you can **reimagine your employee engagement and collaboration** and understand how this fits into Microsoft's Employee Experience platform.

## Discover

Discover value potential and establish innovation guidelines through workshops lead by our human-centered design, technical and business advisory experts. Prioritize use cases to maximize business impact by leveraging industry insights and trends

## Co-create

Experiment with your business on solutions that enable the value cases, iterating from rough prototypes to a refined workable solution. Assess value and decide to scale or iterate further

## Describe

Engage and ideate with your business, describing the specific business value cases and potential solutions, leveraging assets and accelerators from the Avanade Value Network, and injecting our passion and creativity

## Manage & evolve

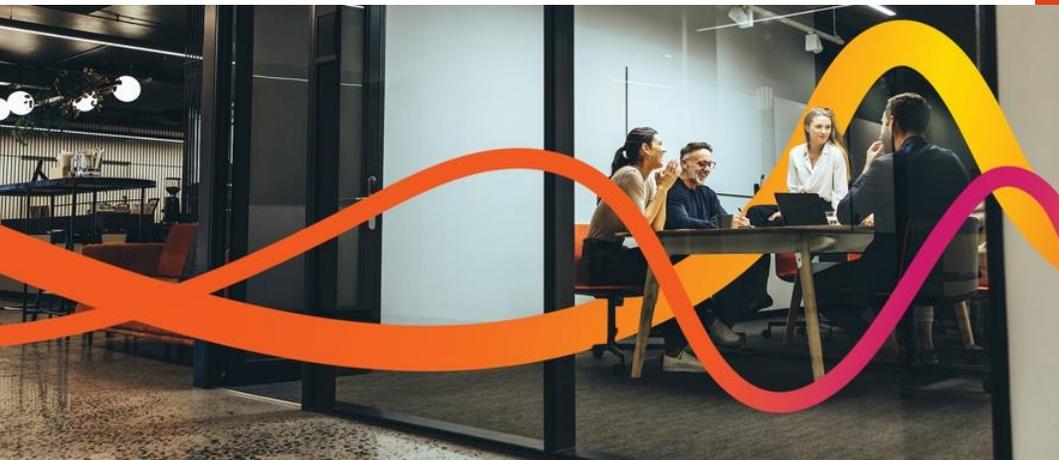

Support and evolve the solutions with scalable teams right-sized to provide long-term operations, ensuring compliance and appropriate governance, while maximizing the value of your investment in the Microsoft ecosystem

# Appendix

Relevant work examples

# We've migrated more than 12 million users to Office 365, helping our clients modernize their workplace and live new ways of working

- Migration of 220,000 users in 50+ countries from IBM Notes and IBM Sametime to Office 365
- Integrated Office 365 Services into the Continental IT service and operations structure
- Implemented Microsoft Office 365 as a standard, cost-effective, agile, responsive and efficient IT solution for supporting the digital workplace

**Seats 220,000**

- Migration to Office 365 Public Cloud - replacement of 40,000 Notes, Sametime and QuickR seats
- Established a state-of-the-art integrated unified communication & collaboration environment
- Reduced the annual running cost of their aging mail and collaboration environment when moving to Office 365 while increasing flexibility for future plans

**Seats 40,000**

*"Avanade has the know-how, the Microsoft expertise, and the innovative spirit we needed to successfully undertake a project of this magnitude."  
- Markus Petrak, Corp. Director Services*

- Migration of 2,000 users into Office 365
- Responsible for new architecture as well as worldwide rollout
- Ready to Scale: The new solution sets the stage for future improvements and scale
- Modern IT: Reduced pains and costs for the IT team, as well as simplified account management and support, enabling ever greater self-service

**Seats 2,000**

*"We were impressed by Avanade's experience and approach. The plan you proposed to us struck all the right notes, so we moved forward. It's clear you knew your stuff."  
- Alexander Voggenauer, Online Solutions Manager*

- Lotus Notes was replaced with Office 365 to provide modern modes of communication and transnational cooperation
- With Office 365, a new foundation layer for 'A New World of Work' has been set to fit the future needs

**Seats 60,000**

*"From the very beginning, we viewed the project as a complete change and not merely a technical migration. You have to clearly demonstrate the benefits to your employees and show how these benefits will improve their day-to-day work."  
- Wolfgang Hausner, Senior Project Manager*

- Office 365 implementation
- Microsoft Office 365 SharePoint online for Intranet
- "Digital circle" for continuous change management

**Seats 1,500**

*"Our goal is to make the information find the user, and not the other way around."  
- Markus Kriechhammer, Teekanne CIO*

- Migration of 330,000 users worldwide from externally hosted, on-premise data centers to Office 365
- Introduction of the highest standards of security based on the "zero-trust principle"
- Introduction of a new cloud-based workplace based on Windows 10 with Intune Management
- Adapted the governance and service structure for new services and cloud mechanisms

**Seats 330,000**

# HARTMANN delivers engaging, personalized collaboration across its global offices

## Avanade boosts collaboration for 10,000+ employees with Yammer and Microsoft SharePoint

### Business Goal:

As one of the world's leading providers of medical and hygiene products, HARTMANN is in the midst of a major cultural change, transforming the way employees collaborate and work in the digital world. Its legacy intranet offered outdated user experiences and content, leading regional organizations to build their own intranets. This made collaboration across borders difficult.

Using surveys, workshops and analysis, HARTMANN defined the requirements for CONNECT, its new intranet. These include social networking features, user-friendly experiences and improved collaboration tools.

### Project & Results:

Avanade helped build and integrate an enterprise-wide solution on Microsoft SharePoint and Yammer. It is now available to more than 10,000 employees worldwide, delivering:

- Personalized experiences with a mix of global, local, static and dialogue-oriented content
- Improved collaboration through SharePoint's document and project management features
- Increased engagement where 75% of employees use 400+ active Yammer groups to share ideas, updates and questions

# Large North American energy company rolls out Power Platform to digitize their business

**Avanade established PowerApps Center of Excellence (COE) and rolled out 20+ stand alone PowerApps and SharePoint List Forms**

## Business Goal:

The client recently decided to use Power Platform in order to digitize highly internal business processes across their organization.

The client was looking for help with their Power Platform roll out and adoption strategy. Avanade was selected to lead the project because of its proven experience in Power Platform and SharePoint.

## Project & Results:

Avanade built 20+ PowerApps and Workflows to digitize business processes for the client.

The project started with an assessment of the company's existing Office 365 environment, business processes and governance policies.

Avanade then prepared a roadmap for setting up a Power Platform CoE within the client organization and documented a strategy to roll out PowerApps as a preferred tool to customize SharePoint List forms.

Avanade also conducted training workshops for the client's IT team and citizen developers in order to enable them to develop no-code or low-code PowerApps.

Avanade's key deliverables for the project included the PowerApps CoE, Invoice Builder app, Employee Onboarding app and Health Safety Incident tracker app
