

Avanade Accelerated Approach (AAA) Offering for Dynamics 365 Finance & Supply Chain

Setting the context - Accelerated ERP Implementation

Challenges typically encountered

Opportunities

Traditional ERP Implementation is slow and can take months or years to implement

Create a modern ERP platform **using an MVP approach** and then optimize it to meet needs and leverage modern capabilities such as AI

Time to Market for immediate return of investment is needed

Even if you have **acquired a new company**, you can quickly stand it up on a modern cloud ERP

Frequent pattern of over-complicating and **extensive customization and complexity** can result in project delays

You are **divesting a business** and want to move that business to a modern ERP on the cloud quickly

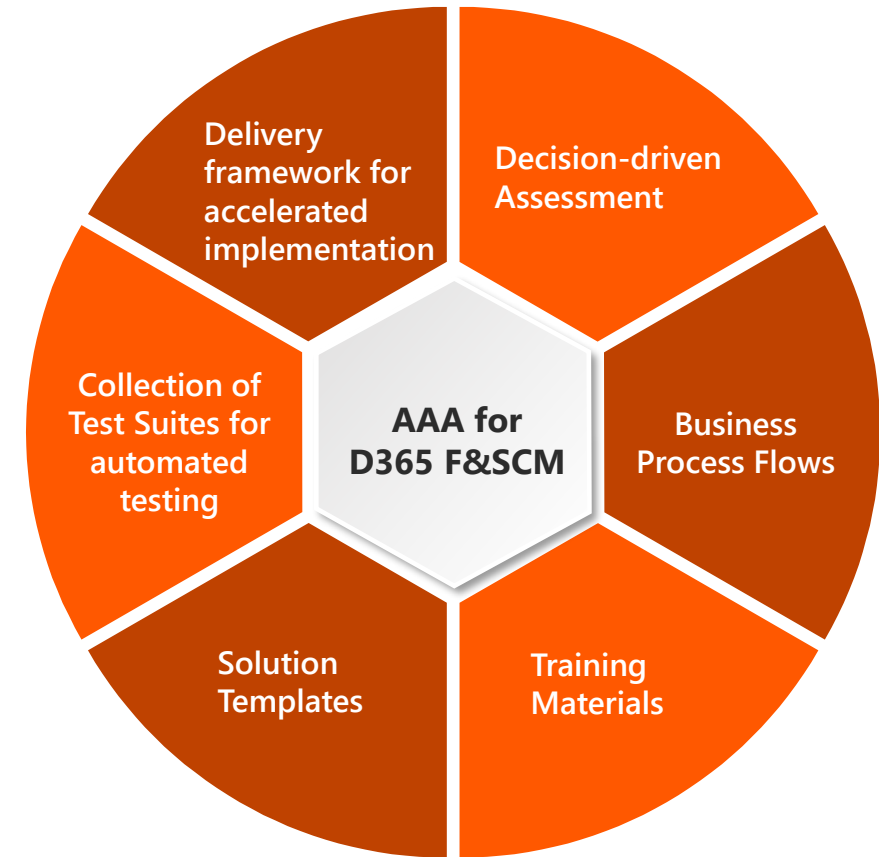

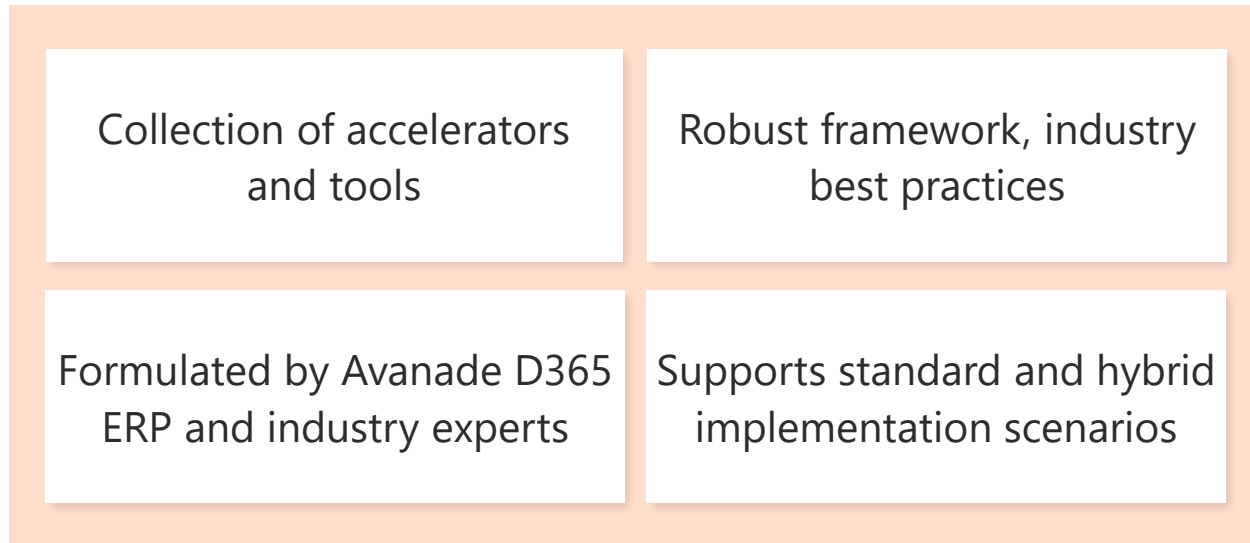

Inability to react quickly to disruptions in the market due to current technical debt

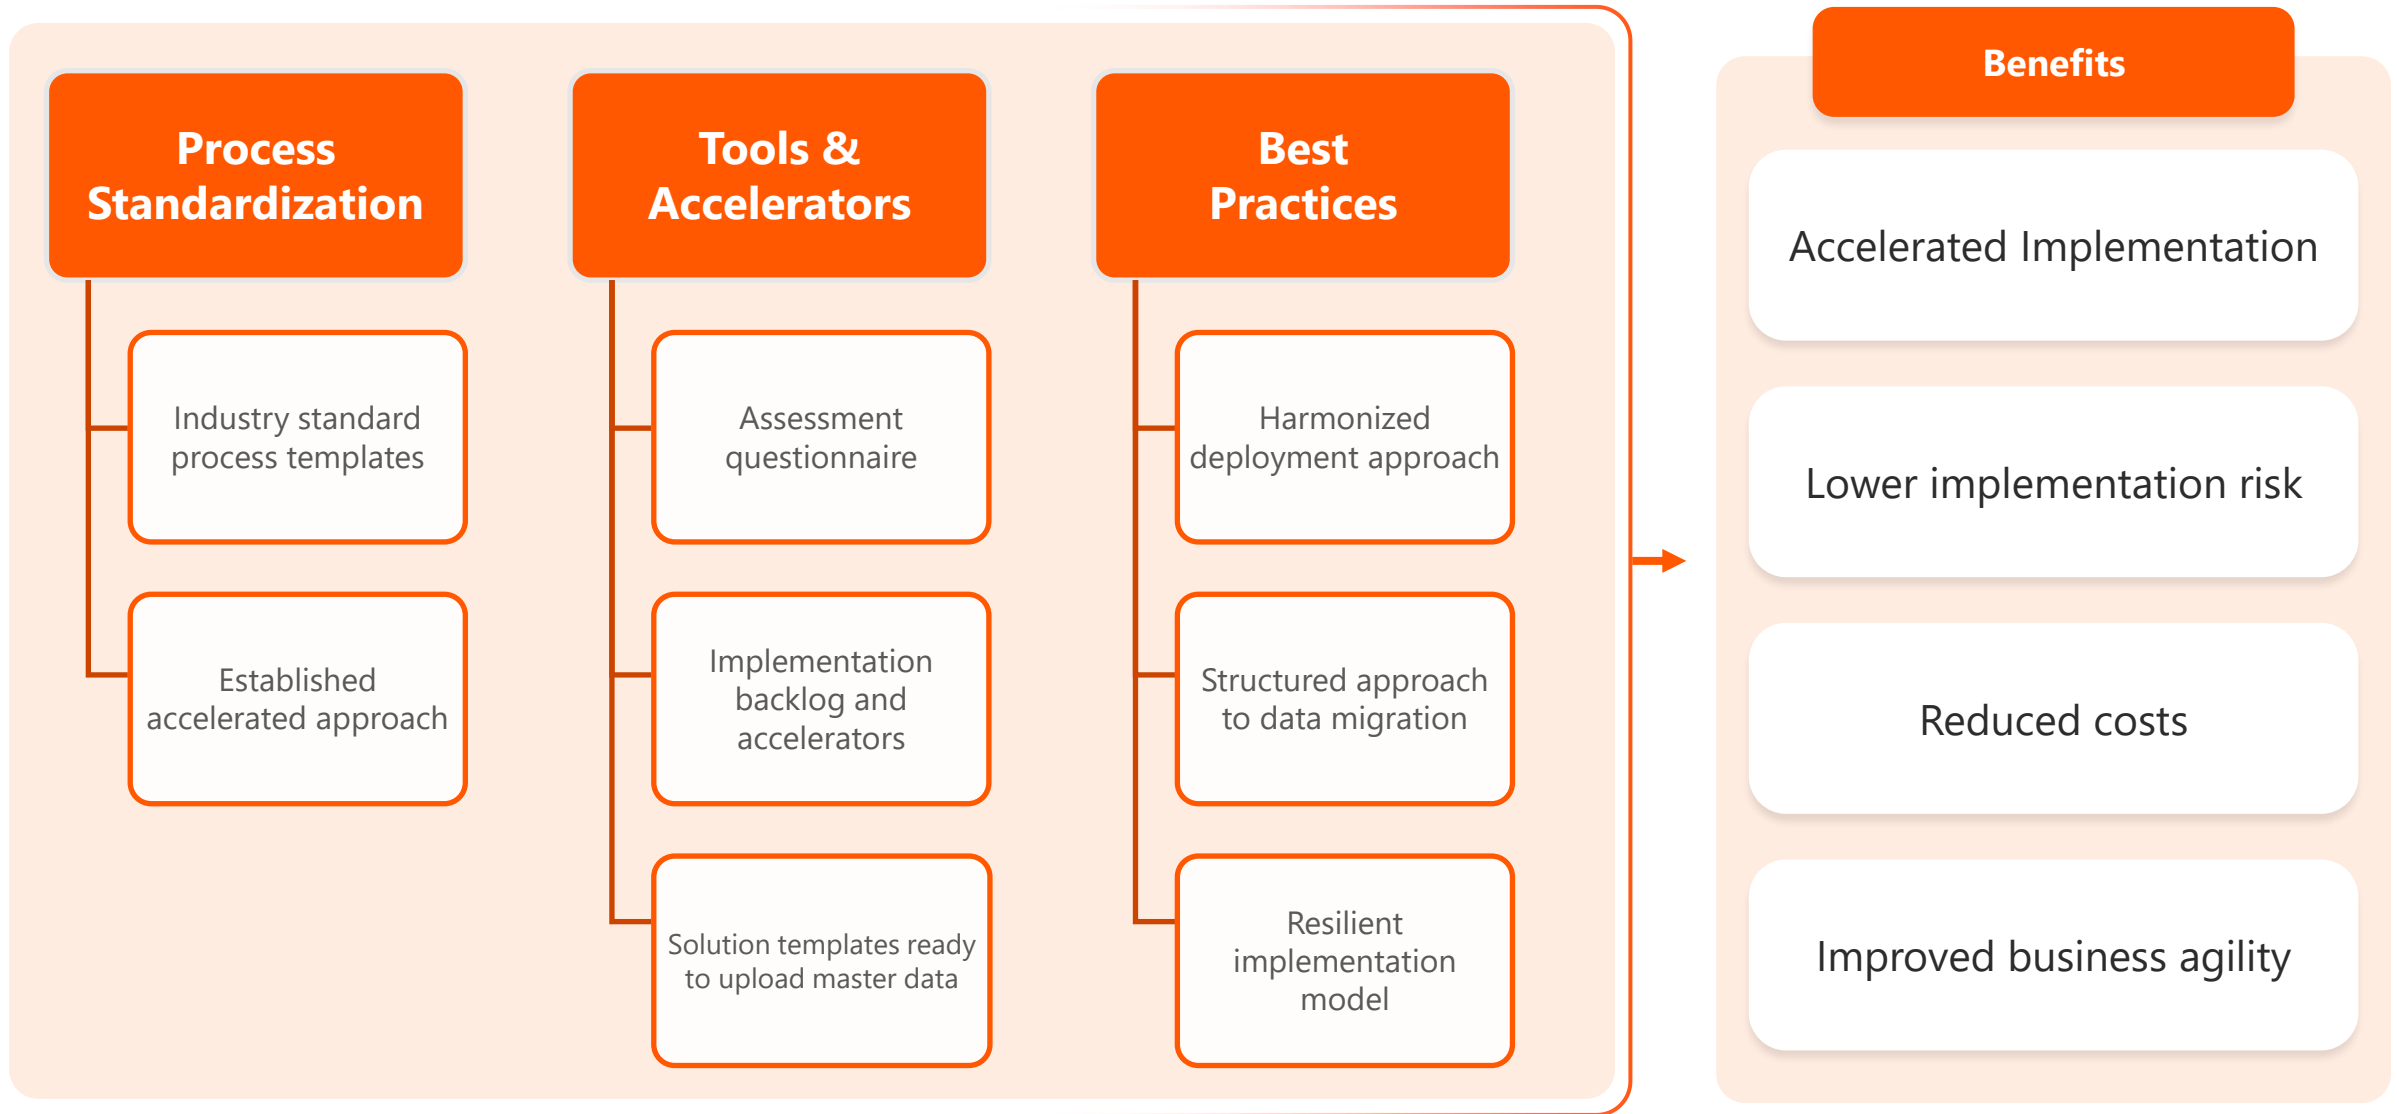

You want to **move some of your workloads** to a new modern Cloud ERP quickly as part of 2-tier ERP strategy

Offering Overview

A **streamlined** method designed to **reduce** the **time** and **complexity** of deploying D365 ERP, enabling organizations to start realizing **benefits** quickly

Offering Differentiators & Benefits

Avanade Accelerated Approach (AAA) for D365 ERP

A streamlined method designed to reduce the time and complexity of deploying D365 ERP

Process Standardization

Industry standard process templates

Established accelerated approach

Tools & Accelerators

Assessment questionnaire

Implementation backlog and accelerators

Solution templates ready to upload master data

Best Practices

Harmonized deployment approach

Structured approach to data migration

Resilient implementation model

Benefits

Accelerated Implementation

Lower implementation risk

Cost reduction

Improved business agility

AAA D365 ERP accelerator brings substantial value to organizations by enabling quicker time to value and minimizing risks

Avanade Accelerated Approach (AAA) for D365 ERP

Have you encountered any of these challenges?
