1-Week Assessment: Environment Evaluation Dashboard

Timeline

The solution will be completed within 1 week and may vary based on the complexity of the existing implementation, ensuring a swift turnaround and minimal disruption for the client.

Overview

This one-week assessment focuses on creating an internal dashboard for clients to assess their environment. The Internal Dashboard provides a comprehensive assessment of the client environment, offering a snapshot of key metrics like infrastructure health, data lineage and performance indicators. It highlights areas of strength and weakness, enabling informed decision-making and strategic planning and serves as a centralized hub for monitoring and evaluating various aspects of the client environment, promoting efficiency and transparency in operations.

Deliverables

A comprehensive report outlining the findings of the assessment, including Data Warehouse and Reporting.

A set of interactive Power BI dashboards which summarize the key insights that highlight critical findings and potential areas for action.

Customized dashboard alerts and notifications are configured to proactively notify of critical events or anomalies in the environment.

Support is available to assist you in utilizing and understanding the insights provided by the dashboard.

Key Features

✦ **Comprehensive Assessment**

Conduct a detailed evaluation of the client's environment to identify pain points, bottlenecks, and areas of improvement.

✦ **Data Gathering and Analysis**

The data quality within the client's environment will be evaluated, identifying any inconsistencies, errors, or data gaps that may impact reporting accuracy and decision-making.

✦ **Interactive Dashboard Creation**

Develop a dynamic and visually appealing dashboard using Power BI, allowing clients to easily visualize data, trends, and performance metrics.

✦ **Actionable Recommendations and Best Practices**

Practical recommendations and tailored best practices will be provided alongside the assessment, enabling implementation of changes driving results

✦ **Based on the assessment findings**

We create a suite of Power BI dashboards providing clear and actionable insights into your client's environment. (For Eg: Data Warehouse Health Dashboard, BI Tool Usage Dashboard)

Next Steps

✦ Schedule a Consultation: Discuss the assessment objectives and desired outcomes to define the scope of the assessment and dashboard development.

✦ Schedule a Consultation: Discuss the assessment objectives and desired outcomes to define the scope of the assessment and dashboard development.
