# Access Governance tool

## in the Marketplace for

Okta Users.

### Overview

AGOV application is a one-stop solution for enterprises to streamline their workforce and customers' application accessibility & usage. Empower managers to independently regulate application accessibility without the intervention of IT, IAM or ticketing processes with AGOV.

### Benefits of AGOV

Right application accessibility to right users at right time

Ensure right application accessibility of the team efficiently by distributing the controls of IT admins to managers.

Slash excess licensing costs

Cutoff excess purchase costs spent on unused software resources and get rid of true up charges.

### Audit reports

Customize and export the application logs for effortless compliance auditing.
