

AVAIgnite: An Advanced Platform to Transform Your AI Journey from Discovery to Delivery

Overview

Accelerate every step of your AI journey with AVAIgnite, an AI-powered co-pilot built to simplify use case creation, budget planning, and Statement of Work (SOW) generation. Hosted within Microsoft Teams and SharePoint, it provides a familiar and collaborative workspace where business users and stakeholders can seamlessly work together. Evolving from the Microsoft AI Discovery Cards Workshop, AVAIgnite transforms collaborative inputs into structured, budget-ready proposals.

With features such as transcript uploads, Diagram Studio sketches, interactive agent chat, or drag-and-drop AI Discovery Cards, the platform automatically generates implementation timelines, Azure cost estimates, and Microsoft Commerce Incentives (MCI) funding eligibility. By integrating approval workflows and DocuSign support, organizations can move from plan to signed agreement within a unified platform, driving faster decisions and greater efficiency.

Key Features

✦ Flexible Initiation

Start generating business ideas by uploading meeting transcripts, agent chat, drag-and-drop AI features, or designing workflows in Diagram Studio.

✦ Smart Proposal Generation

Generate instant budgetary estimates with detailed cost breakdowns, projected monthly Azure consumption, and funding eligibility insights.

✦ SOW Automation

Create Statements of Work in minutes, route them for internal approvals, and finalize contracts efficiently with DocuSign.

✦ Persistent History

Maintain continuity by accessing previously generated use cases, proposals, and SOWs, preserving organizational knowledge.

✦ Collaboration-Ready

Leverage structured internal workflows that enable reviews, track changes, and keep projects moving without delays.

Deliverables

Integrate the AVAIgnite application and Agent with your organization's AI adoption roadmap to enhance your journey toward AI integration.

Complete reporting on proposals, budgets, and past sessions.

Streamlined SOW review and approval workflows to speed up contracting.

Next Steps

- ✦ Schedule a session to capture and evaluate your AI ideas, including cost and implementation planning with AVAIgnite
- ✦ Review generated proposals and Statements of Work to finalize your innovation roadmap efficiently.
- ✦ Connect with AVASOFT in accelerating your organization's AI adoption strategy and transforming ideas into delivered solutions.
