

Smoothly Transition File Shares to M365

Overview

Simplify your migration process with our file shares migration solution. We leverage advanced techniques to ensure a smooth transfer of data from on premises file shares to Microsoft 365, preserving the integrity and structure of your information. With our expertise, you can seamlessly transition to M365. Our file share migration supports migration to SharePoint Document Library, OneDrive, or Azure File Shares.

Key Features

Comprehensive Migration Methodology

- Analysis & Rationalization: Verify source & target access, tool installation, assessment execution, define migration scopes, and prepare migration strategy & batch planning with stakeholders' communication.
- Migration Execution & Remediation: Pilot migration & sign off, batch migration, content verification, issue triage, and fixing.
- Production Cutover & Support: Perform incremental migration and cutover, communicate with stakeholders, and provide post-migration support.

End-to-End Ownership & Expert Coordination

Seamless transition overseen by AVAMIGRATRON Team with collaborative planning for optimal solutions.

Post-Production Support & Flexible Remediation Services

Two weeks of free help for immediate issue resolution and custom integration or application development at an added cost.

Comprehensive Migration & Preserve Content Metadata

Complete migration of data to the target platform, ensuring all metadata associated with the contents is preserved.

Parallel Migration

Simultaneous execution of multiple migration processes for efficiency.

Custom Migration Capabilities & Initial & Incremental Migration:

Selective migration based on specific criteria for tailored solutions, offering flexibility for both initial and incremental migration.

Parallel Migration & Real-time Monitoring

Simultaneous execution of multiple migration processes for efficiency, with real-time monitoring of migration progress and detailed reporting.

Deliverables

Contact information and procedures for technical support related to product setup and initial configuration.

A comprehensive migration report and detailed assessment report detailing the migration process and outcomes.

Access to application user guide to assist you throughout the migration journey.
