What you get with this

Microsoft Sentinel - Log Management and Threat detection Assessment

- In today's digital landscape, are traditional security measures falling short against increasing cyber threats?

- Explore our integration of Microsoft Sentinel for log management and threat detection to bolster defense strategies and seamlessly monitor infrastructure and network, swiftly detect risks, and respond precisely with our collaboration.

- We Strengthen your cyber defenses by integrating Microsoft Sentinel for log management and threat detection to improve security and gain insights into emerging threats.

- Partner with us for seamless integration, tailored to meet your organization's specific needs.

Comprehensive Log Management

- Strengthen network security with enhanced monitoring through Microsoft Sentinel, ensuring robust protection against cyber threats.

Real –Time Incident Response

- Streamline network management with unified solutions, optimizing efficiency and enhancing overall network performance.

Advanced Threat Detection

- Leverage cutting-edge threat detection capabilities to proactively identify and mitigate security threats, including suspicious activities, malware infections, and insider threats, before they escalate into major incidents.

Our eccentric features of

Microsoft Sentinel - Log Management and Threat detection Assessment

Find the most recent stats below:

- Organizations integrating Microsoft Sentinel for Log management and Threat detection service report a **52% decrease in security incidents.**

- The average cost of a data breach is reduced to **$3.2 million** with integrated Microsoft Sentinel for Log management and Threat detection service.

- Integrated solutions achieve a **99% detection rate** for known threats.

Centralized Log Collection

- Collect logs from various sources, including cloud services, on-premises infrastructure, and third-party applications, into a centralized repository for analysis and correlation.

Alerting and Notifications

- Set up real-time alerts and notifications to promptly inform security teams of potential threats and incidents detected by any of the platforms for your organization infrastructure.

Centralized Log Management

- Gain comprehensive visibility into security events and incidents across your organization's infrastructure.

AVASOFT

Assessment Scope - Microsoft Sentinel - Log Management and Threat detection Assessment

Centralized Log Management Solution

- Organize all security data sources efficiently.
- Ensure comprehensive coverage and analysis.

Security Assessment

- Identify vulnerabilities and areas for improvement.
- Develop targeted security strategies based on assessment results.

Incident and Alert Detection Policies

- Swiftly identify and respond to security incidents.
- Minimize response time with fine-tuned alert policies.
