Real Estate: Centralized and automated workflow for recruitment

Our client holds 22 franchises in and around the USA. Every franchise has its respective website with embedded forms for recruitment drives. Since all these forms were scattered our client was unable to experience a centralized workflow. Our team resolved the problem by leveraging cutting-edge Power Automate solutions.

IDEAL SOLUTION

All the forms that were embedded in the sites served a similar purpose. But since they were not centralized the client was not able to maintain them.

Making the changes manually in all the forms affected their productivity and consumed a lot of time.
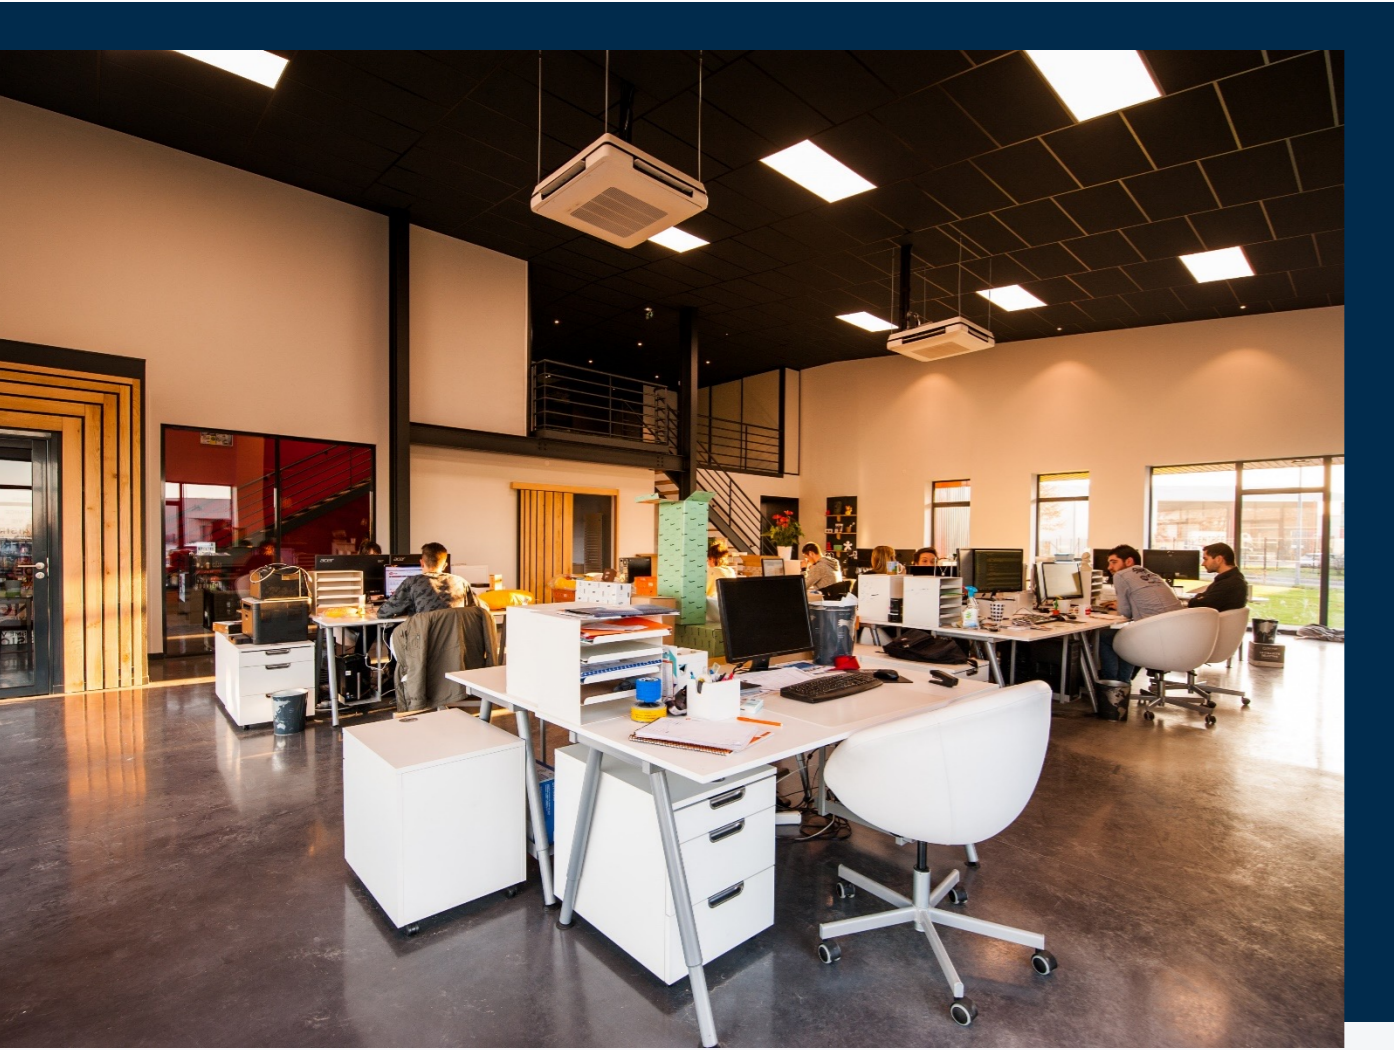

Integrated all the 22 forms and provided a centralized workflow through Microsoft forms.

Worked with the client's CRM platform and created a customized API to read and record all the forms in the same platform.

DESIRED OUTCOMES

The changes that are made in one form were reflected in all 22 forms.

This saved the client from manually making the changes in all the individual forms and helped them to prioritize critical business areas.

Workflow Automation Solutions

Simplify workflows with next-gen automation solutions that will increase operational efficiency and reduce workloads. Create intelligent and intuitive workflows that are custom designed to meet your unique business needs.

1 Workflow Automation

Build intuitive workflows to automate daily, weekly, and quarterly actions based on your business needs.

2 Third-party Integration

Establish connections between applications and trigger actions in third-party applications to achieve efficiency.

3 Email Reminders

Automate approval mails and reminders to improve focus on priority tasks. Create/receive email reminders for critical business areas.

AVASOFT, WORKFLOW AUTOMATION & MICROSOFT 365

A cost-effective and economically feasible workflow automation solution that can resolve all your unique business problems. Our team will help you to reduce IT intervention and enhance workflow productivity by leveraging the most out of Microsoft Power Platform.
