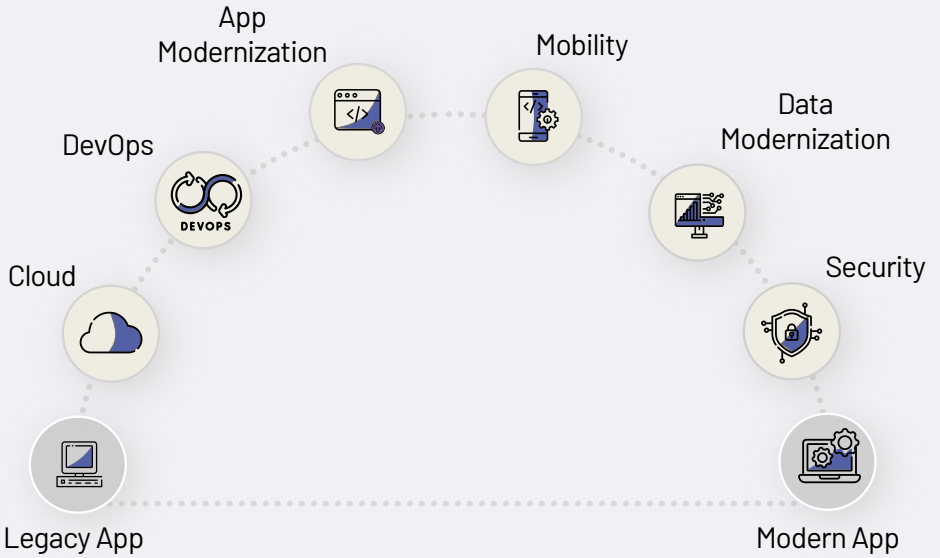
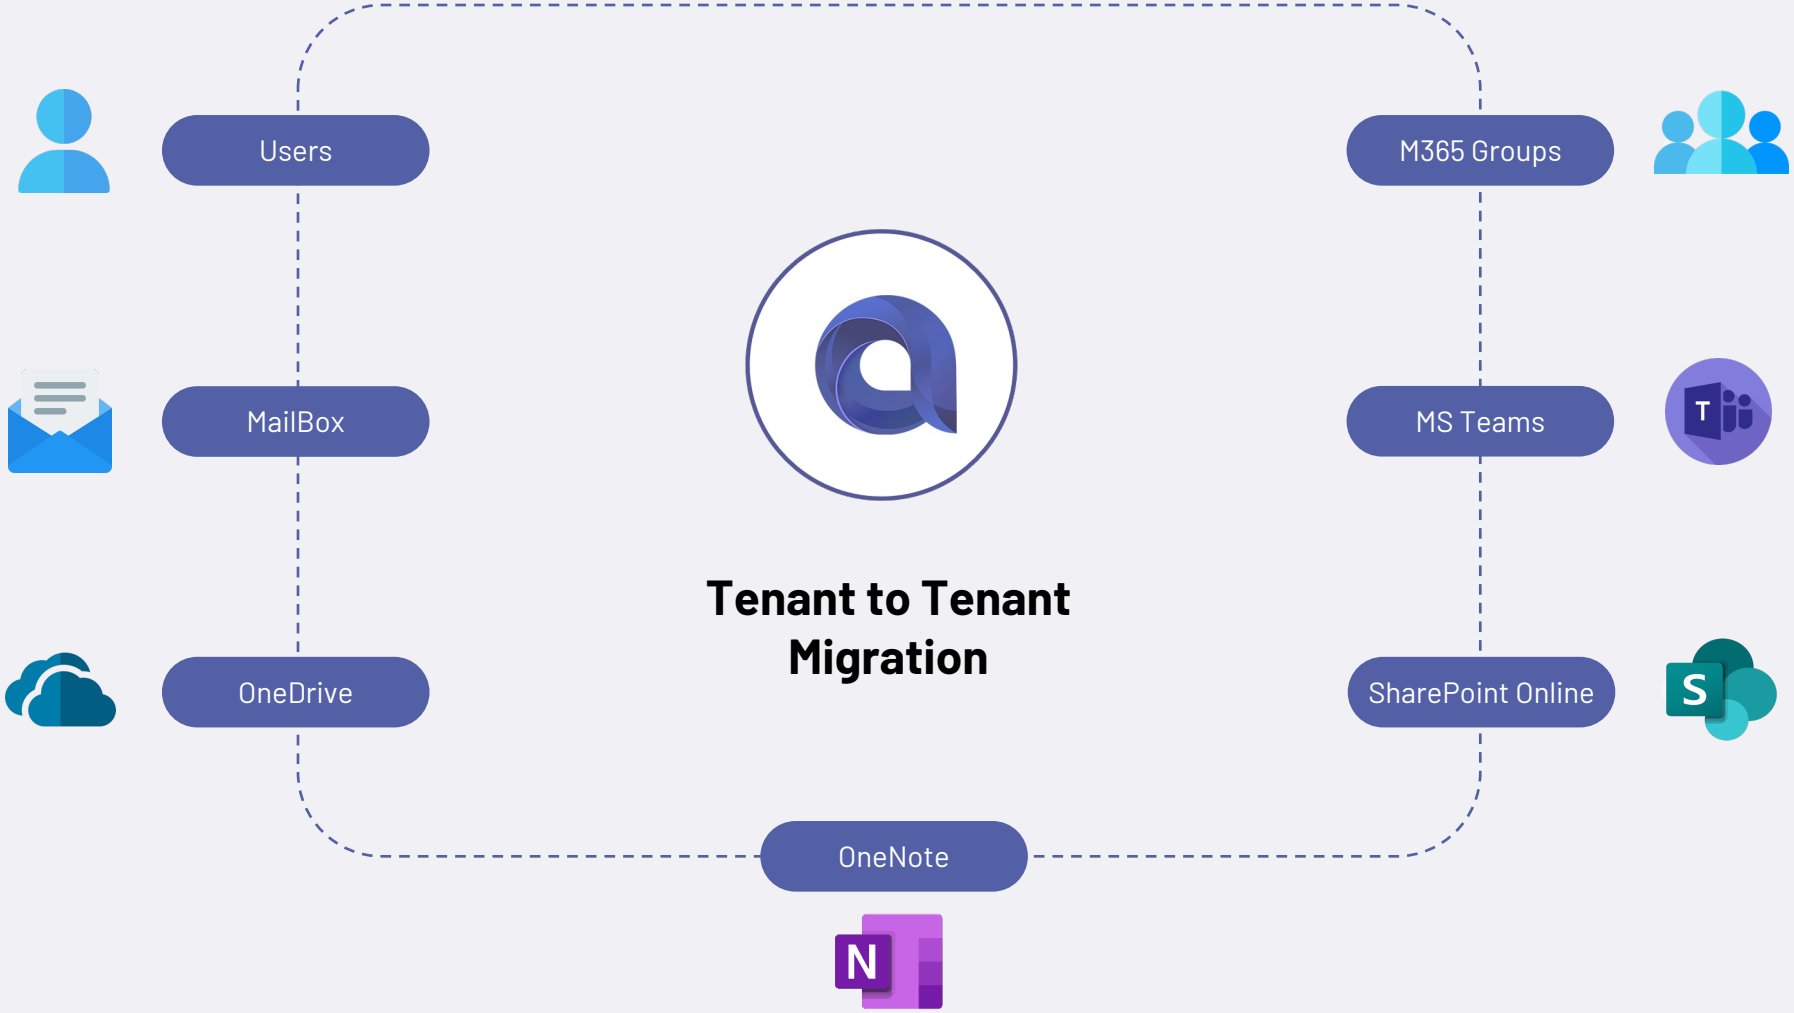
Digital Transformation

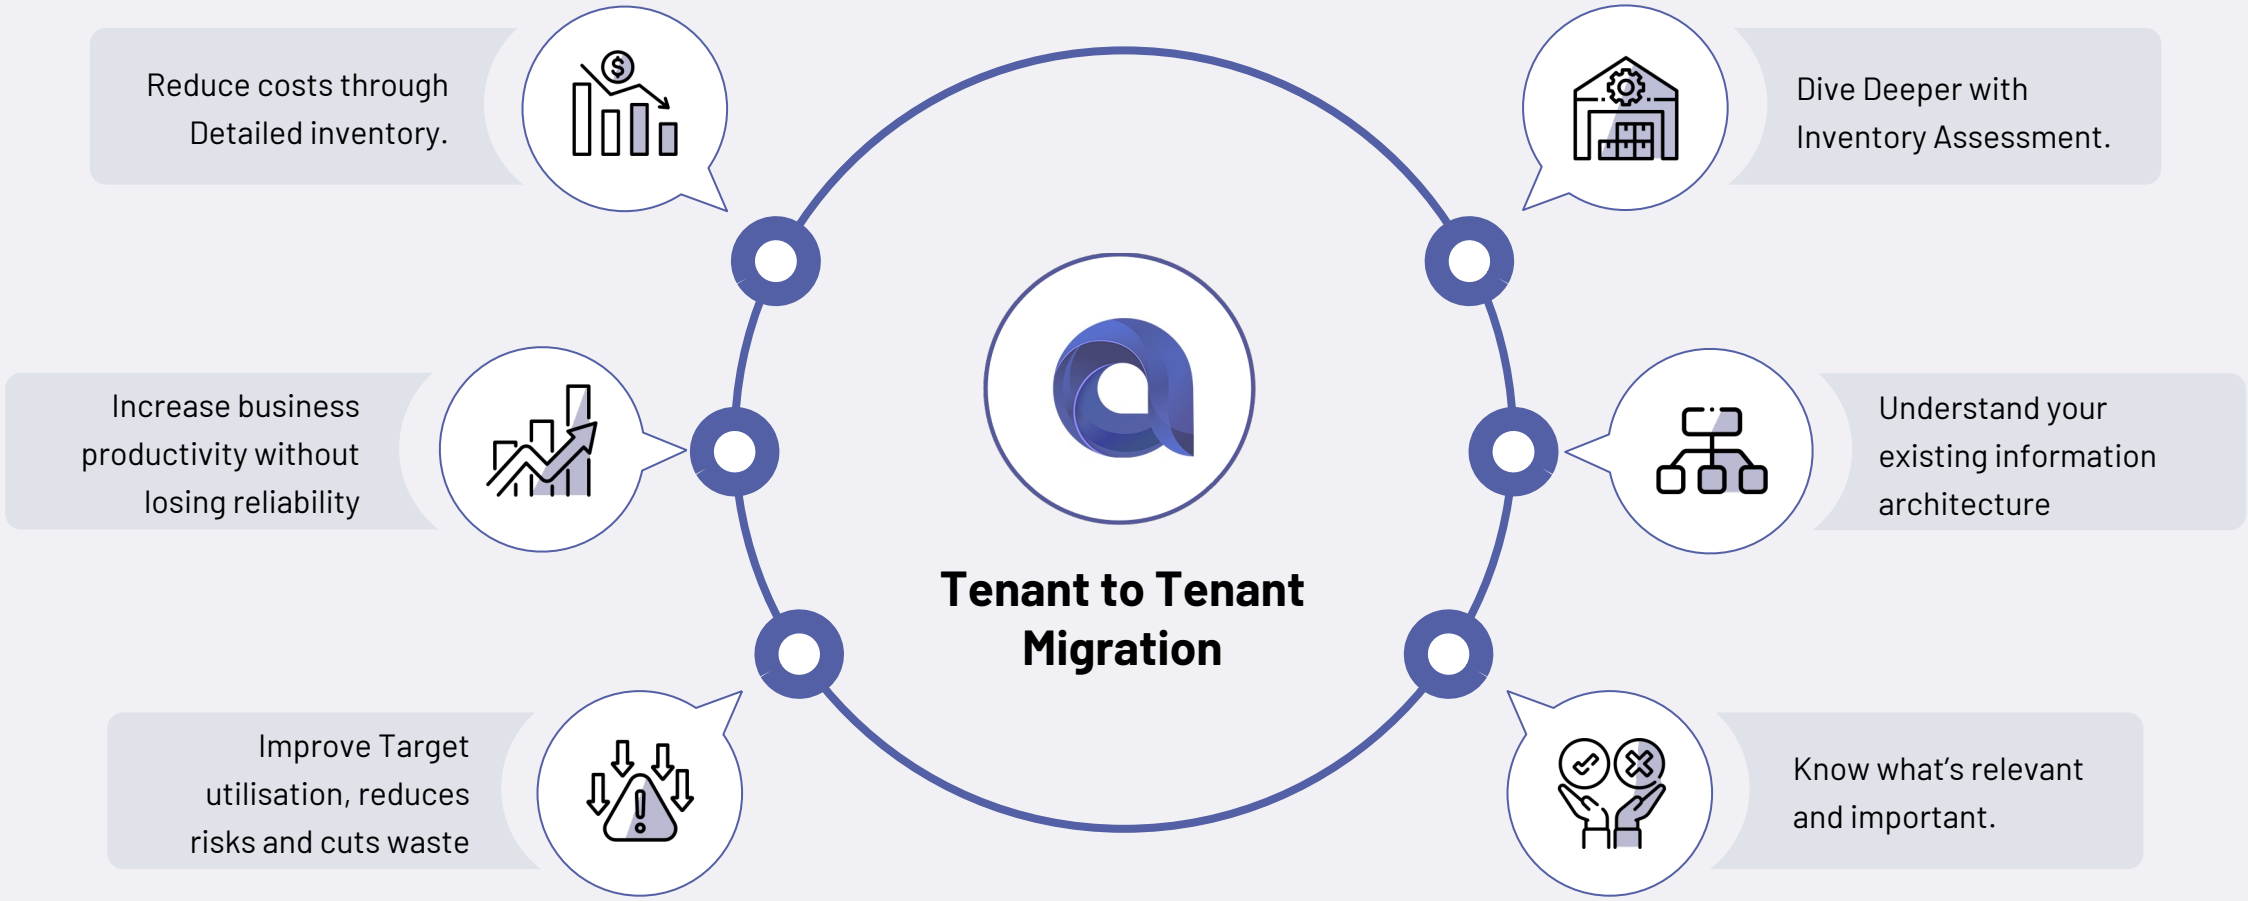


AVAMIGRATRON – The most comprehensive and automated solution for migrating your business enterprises from one Microsoft 365 Tenant to another!



Migration Approach

Benefits of Inventory Assessment



Migration Approach

Migration Best Flow practices

Kick off a team to pilot the migration

Define & identify critical data

Use a lifecycle-based approach

Phase I - Exchange

- User Creation in target tenant
- License assigning
- Connection setup in AVAMIGRATRON
- Detail Inventory & User mapping
- Kickstart Migration
- Verify the migrated data

Phase II – Groups

- Validate whether all users are migrated
- Source and destination mapping
- Kickstart Migration
- Verify the migrated data

Phase III - Teams

- Validate whether all users are migrated
- Teams mapping will be done
- Kickstart Migration
- Verify the migrated data

Phase IV – SharePoint / OneDrive

- Connection Establishment
- Mappings for sites which are not enabled with Teams
- Mapping for OneDrive Users
- Kickstart Migration
- Verify the migrated data

Migration Approach

Monitor

Content validation – To ensure that your projects are on schedule and on point.

Be proactive with migration report and track continuously to avoid over-deployment.

Track migration status and progress on the report.

Responsive monitoring, customizable reports

Keep an eye on your migration process.
