(Off-the-shelf)

Does your company offer data recovery and hardware repair services?

Avec Global is well-known for its comprehensive data recovery and hardware repair services. Our team of experts are skilled in recovering data from various storage devices and repairing a wide range of hardware issues. We have state-of-the-art facilities to ensure the highest chances of successful data recovery and hardware repair.

✗ **Cannot converse**
   - so questions have to be carefully worded

✗ **Limited search**
   - question / answer matches often not enough
   - embeddings not best-in-class

✗ **Basic chunking**
   - not appropriate for tenders

✗ **Monolithic**
   - can get out-of-date quickly

✗ **Prone to hallucination**

✗ **Does not show sources**
   - answers have to be manually verified

(Microsoft AOAI, tuned by us)

Does your company offer data recovery and hardware repair services?

Avec Global offers a range of IT professional services, including data migration and ERP solution support services. Their data migration services are one of their core capabilities, with a team experienced in ERP data migration. They understand the requirements, complexity, considerations, and approach required for data migration into various ERP solutions, and the reconciliation impacts of incorrect data migration.

In terms of IT security and compliance, Avec provides services for the delivery, implementation, and ongoing enforcement of IT security compliance via defence protocols, security policy enforcement, and disaster recovery with failover facilities incorporated. However, there is no explicit mention of data recovery and hardware repair services in the tender documents. It's possible that these services could be included within their broader IT professional services, but for a definitive answer, it would be best to directly contact Avec Global.

What work have we done with local councils?

Context Retrieval

Avec has worked with local councils on various projects. Here are a few examples:

1. The Hills Shire Council: Avec provided implementation services for the council's new ERP (Enterprise Resource Planning) system. The services included project management, solution design, solution configuration, data migration, and training design and delivery.

2. Cairns Regional Council: Avec played a leading role in the implementation services of the council's new ERP system. The services provided included project management, solution design, solution configuration, business analysis, data migration, and more.

These are just a couple of examples of the work Avec has done with local councils. We have experience in working with councils on a range of projects, including technology implementations, process improvements, and consulting services. Our team understands the unique challenges and requirements of local councils and is committed to delivering successful outcomes.
