

# Cloud Security is our Industry.

Let's work to make it the best it can be

It's easy to get anywhere if you don't know where you're going. Let us align your corporate security and governance policies to work with your cloud technology.

## Managed Predictability <sup>™</sup>

Not every security and governance policy is fit for each organization, We understand that and strive to make sure that we can secure your cloud whilst illustrating risks to manage and control, whilst improving your posture.

- Alignment to developed security and governance polies
- Constant driving of measured security and compliance
- Live monitoring with Industry-leading SIEM and SOC services

### Align the Detail in the Haystack

- Asses the Enterprise goals
- Aligning of cloud policies and security
- Application of twelve (12) ISO27001 Compliance policies

#### Enterprise Alignment to Cloud

### Remove the layers of security

- Protect Data at its source
- Understand what cloud security means
- Apply up to 27 Technical Controls – based on Corporate Polices

#### Reassess your cloud security

### Monitor and secure

- Monitor your data and what it is doing
- SANS based reaction to Incidents
- Roadmap to constantly improve visibility

#### Visualise and Respond

**AVeS helped us to understand that Cloud security and adoption does not mean that we need to revamp everything, just that we need to realign our approach which in turn has created a mind shift of how we handle our data and people accessing it.**

- Curtis McBride I.T Manager, Automated Outsourcing Services

# How Managed Predictability™ works, to achieve business benefits

## Proof & Statistics

- Slow adoption to POPIA and GDPR (less than 40%)
