Microsoft Places Workshop

Microsoft Places delivers a connected workspace experience designed to elevate hybrid work by coordinating, modernizing, and optimizing your work environment.

Empower employees to prioritize the moments that matter

Microsoft Places helps employees quickly plan and coordinate when and where they need to be, modernizes the workplace experience by providing tools for seamless collaboration, and assists HR in understanding how and where employees are meeting compared to their hybrid work plans. Additionally, Microsoft Places enables Real Estate teams to make informed decisions about space utilization trends and needs.

Microsoft Places Workshop

Ensure your organization is prepared for flexible work with our comprehensive three-day workshop.

This workshop will focus on aligning your functional needs, spaces, platforms, and long-term administrative and management plans to meet your connected workplace requirements now and into the future.

Our Microsoft Places Workshop will prepare you for a connected workplace that is simple to use and support, scales with your business, and is secure by design.

Workshop framework

- **Strategic Alignment:** Focus on aligning functional needs, spaces, platforms, and long-term administrative and management plans to meet connected workplace requirements.
- **Comprehensive Engagement:** Delivered through three remote or onsite workshop sessions led by experienced consultants and subject matter experts.
- **Tailored Roadmap:** Provide a high-level findings report and develop a customized roadmap to ensure long-term success in adopting Microsoft Places.
- **Flexible Work Preparedness:** Equip organizations with tools to support flexible and seamless collaboration while ensuring scalability, simplicity, and security.
- **Time-Bound Completion:** Set a clear target of 45 days to complete the workshop, finalize deliverables, and prepare the organization for implementation
