

Small Microsoft Teams Room Package

A+V helps people communicate and increase the efficiency of your teams by designing and implementing video-conferencing solutions based on Microsoft Teams.

We are a certified Microsoft Teams Rooms integrator - we provide a full range of services, from needs analysis, preparation of concepts and detailed design, to the delivery, implementation and commissioning of multimedia systems, and ending with the provision of warranty and SLA services.

Why A+V?

With over 15 years of experience in the industry, A+V team of experts including engineers, acoustics & IT professionals, is there to guide you through the new AV system implementation and adoption. As an extension of your team, we share our knowledge to provide you with an efficient hybrid workplace and make your projects run smoothly.

Get started today with

Small MS Teams Room (Huddle Room) is one of the most common conference spaces in current offices. It is dedicated to quick consultations, project meetings or brain-storming sessions in small groups – utilizing MS Teams & video conferencing equipment. Fully integrated MS Teams Room includes a display screen, a camera, microphone(s) and speakers, a device with MS Teams software and a touch panel, permanently placed in the conference room – this enables joining a video conference without bringing your own device.

Small Microsoft Teams Room Package

Let's communicate and collaborate

Microsoft Teams Room is a space for hybrid meetings and collaboration.

Small MS Teams Room (Huddle Room) is one of the most common conference spaces in current offices. It is dedicated to quick consultations, project meetings or brainstorming sessions in small groups – utilizing MS Teams & video conferencing equipment. Fully integrated MS Teams Room includes a display screen, a camera, microphone(s) and speakers and a device with MS Teams software and a touch panel, permanently placed in the conference room – this enables joining a video conference without bringing your own device.

Functionalities

Image

Displaying image from the Teams meeting or a computer onto the display screen connected via HDMI cable (presentation, video conference connection)

Sound

Playing sound through speakers of the video conferencing system, from the Teams meeting or a computer connected to the system via HDMI cable

Video conference

Conducting video conference without the need for a computer with a video conference software installed. Microsoft Teams offers a variety of video conference management features.

Control

AV system management via a touch panel according to the standard of the chosen manufacturer. There are two work mode options to choose from the touch panel: presentation or video conference.
