

Azure Landing Zones Accelerator

Accelerate the customer adoption of Microsoft Azure with a hands-on Landing Zones engagement.

Aware Group have designed this Azure Landing Zones engagement to showcase Cloud Adoption Framework, Cloud Governance and Landing Zones principles through a series of hands-on-labs and proof-of-value exercises, built in the customer's Azure tenant.

We'll work side-by-side with the customer team to create and configure an Azure tenant and subscription (if required), implement a framework with naming conventions, tagging strategies and working with the business users to implement Azure Blueprints that suit the needs of the customer.

Accelerator Modules

- Cloud Governance
- Azure Blueprints/Policies
- Cost Management
- Resource/Tag Conventions
- Deployment Methodologies
- Security
- Auditing/Monitoring
- Access Control

Each engagement is targeted to the customer's needs but may include:

Discovery

Planning & preparation to gather background on customer, define approach and business problem.

Milestone 1

Establish and implement Azure Landing Zones pattern covering architecture, deployment & identity.

Milestone 2

Azure platform overview, spin up subscription in customer tenant, introduction to governance in Azure.

Milestone 3

Summary report, future planning, retrospective, next steps + wrap-up.

Milestone 4

Establish and implement naming conventions, foundational Azure Blueprints and policies, Cost Management controls.

Is the Azure Landing Zones Accelerator right for your customers?
