Connected Factory Solution Accelerator

Accelerate the Intelligent Edge with a two-week engagement leveraging Azure Stack Edge.

Aware Group have designed the Azure Stack Edge Accelerator to showcase Intelligent Edge capability and integration with the wider Azure platform through hands-on-labs and proof-of-value exercises, leveraging real customer data.

Over the course of two weeks, Aware Group will work side-by-side with the customer team to deploy and configure Azure Stack Edge and customise with a specific workload. Topics covered include Activation and Deployment, IoT Edge, edge architecture and more.

Accelerator Modules

- Setup & Deployment
- Azure IoT Edge
- Application Modernisation
- Machine Learning
- Cost Management
- Security
- Monitoring
- CI/CD Integration
- DevOps
- Hybrid Connectivity

Discovery
Planning & preparation to gather background on customer, define approach and business problem.

Milestone 1
Azure Stack Edge overview - setup and activate in customer tenant, deep-dive into business problem.

Milestone 2
Common deployment patterns and practices (PnP), network configuration and security.

Milestone 3
Deploy protocol translation container and test with customer test environment.

Milestone 4
Integration with wider Azure platform services such as Data Lake Storage or Machine Learning.

Final Demo
Summary report, future planning, retrospective, next steps + wrap-up.
