Data Migration

by Axapta Masters

Are you worried about your data being lost?

Cannot find your way around all the data?

Let us transfer your data safely!

Our professionals at Axapta Masters use proven methods, sector-specific best practices, and data privacy requirements to carry out data migrations **swiftly and flawlessly**.

Select **Axapta Masters** as a partner who can guide you through the entire process and protect your business from the risk of significant operational downtime, financial consequences, business disruption and data loss.
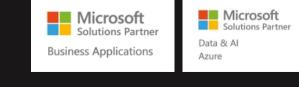

To find out more about our data migration services and how we can assist you in realizing the full value of your data, contact us right away.

A look into our Data Migration process:

• **Evaluate and design -** identify and appraise the existing data sources.

• **Extract -** develop an approach and tools to extract only the needed data from the source system.

• **Cleanse -** adjust and standardize the extracted data.

• **Transform -** transform the extracted data from any source system to the needed D365 data format.

• **Load -** import the cleansed data to the new system.

• **Validate -** test and confirm the import process' success.

• **Track and report -** implement tracking and reporting KPIs, templates and visualizations.

With more than 10 years of experience, Axapta Masters will guarantee the effective completion of your data transfer procedure.
