Élite de Negocios Tecnológicos SL

ABOUT US

We are specialists

We are a company specializing in Microsoft Dynamics 365 platform and Power Platform technology, with the goal of improving the quality of business applications deployments by combining knowledge and skills to adapt the Microsoft suite to the client's business processes.

We are focused on providing high value-added services thanks to the proven experience of our Senior team.

We mainly perform MSDyn365FO y MSDyn365CE consulting, development and training projects, nationally and internationally.

MVP

Seniority

Explorers

Microsoft

We are Internationally recognized by Microsoft through different awards and certifications: MVP, MCT and MCP.
The only partner in the world with 4 Business Applications MVPs.

Our team has senior expert consultants and architects with more than 12 years of experience, working in more than 250 national implementations and international Roll-Outs between in both ERP and CRM.

First Microsoft partner with its own eLearning platform in Spanish for Dynamics AX and Dynamics 365 suite.
We deploy the first successful D365FO implementations in Spain.

Best Practice using all the latest developments that Microsoft releases: Power Platform, Life Cycle Services, Power BI, Management Reporter, Azure DevOps, Teams...

TRAINING

Dynamics AX & CRM SERVICES

Mastery and proven experience in these solutions and their migration to the cloud.

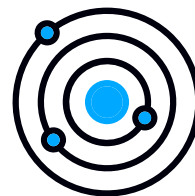

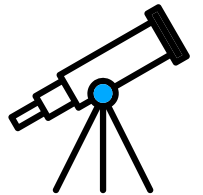

PERFORMANCE & INFRASTRUCTURE

To quickly see the performance improvement by applying the strategy of best practices in the implementation of Microsoft Dynamics AX or CRM as environment management, correct indexing or data security policies.

ASSESSMENT & EVOLUTIVES

Identify and implement points of technological evolution and business process optimization, with the aim of improving operations, performance and cover new requirements.

MIGRATION & REIMPLEMENTATION

Our specialized team in version changes, will provide your company with the ability to decide which type of migration is ideal for the organization, since sometimes, it is recommended to reimplant processes instead of doing a technical migration.
