

# Accelerate reliable Azure releases with standardized CI/CD automation

## About Aximsoft – Azure CI/CD Automation Services:

We are a Microsoft Solutions Partner for Data & AI, delivering Azure CI/CD automation services. We help engineering teams standardize build, test, and deployment pipelines to improve reliability, efficiency, and time-to-market on Azure.

### What we offer

We design and implement Azure-native CI/CD pipelines to automate build, test, and deployment workflows across Azure environments.

Our services integrate automated testing, quality gates, and Infrastructure as Code using version-controlled templates to ensure consistent, secure, and reliable releases across development, staging, and production.

We also configure pipeline monitoring and continuously optimize performance to reduce deployment risks and failures.

Through structured knowledge transfer and post-implementation support, we enable engineering teams to independently manage, scale, and continuously mature their CI/CD practices on Azure.

### What our customers are saying

"The team at Aximsoft is reliable, accountable, efficient and very productive. Plus, there is a very high level of trust. Those are the values that Aximsoft offers, and that we share."

– David Xu, Sr.  
VP –Engineering, Xtime

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

## Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
