

# Turn fragmented data into trusted analytics-ready intelligence

## About Aximsoft – DAaaS Ops:

We are a Microsoft Solutions Partner for Data & AI delivering DAaaS Ops on Azure. We help teams operationalize data through automated controls, observability, and lifecycle management—ensuring reliable, scalable insights.

## What we offer

We turn data platforms into dependable business assets by establishing a clear operating model for how data is built, monitored, and consumed across Microsoft data technologies.

Through a structured engagement, we eliminate data downtime, quality issues, and operational blind spots that slow decision-making. We deliver automated data pipelines, built-in quality checks, end-to-end visibility into data movement, and trusted analytics.

We enable leaders to operate with confidence that reports, dashboards, and AI initiatives are powered by reliable data that scales securely and consistently with the business—allowing teams to act faster, reduce operational risk, and focus on outcomes instead of fixing data issues.

## What our customers are saying

“Aximsoft turned our vision into reality with exceptional execution. Their creativity and delivery elevated our web presence across North America.”

– Scott Martin, CEO and President, inteliGlas

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
