

Vortex™

Accelerate Your Journey to Microsoft Fabric with Vortex.

The only automated, AI-driven BI migration solution

70% FASTER

Legacy BI Platforms

Complex legacy environments with proprietary scripts and data models

Vortex Intelligent Automation

Secure metadata harvesting, strategic rationalization, and AI-powered conversion

Fabric Modern Architecture

Standardized SQL, integrated data warehouse, and cloud-native analytics

Migrate Confidently With AI & Automation

Speed Without Sacrifice

Automate up to 70% of the migration process, transforming years of work into months.

Unmatched Accuracy & Consistency

AI-driven conversion recreates your legacy applications without human error or quality variance.

Strategic Transformation

Turn migration challenges into strategic wins by prioritizing high-value applications.

Ready to Migrate to Fabric?

See how Vortex can get you there 70% faster!

How Vortex Works: Three-Phase Approach

Metadata Harvesting

Securely extracts app metadata using official APIs with encryption—ensuring no sensitive data leaves your platform.

Intelligent Rationalization

Analyzes your legacy portfolio to identify which apps to migrate, retire, or reimagine based on usage data and business value.

Automated Conversion

Converts legacy apps to Power BI with AI precision, recreating visuals while transforming proprietary scripts into standard SQL.

1 Legacy Source

The legacy environment with its distinct visualization style and UI elements.

2 Automatic Conversion

Vortex's AI-powered transformation process that automatically converts legacy apps to Power BI—preserving critical business logic.

3 Power BI Optimized

A fully converted and optimized Power BI dashboard that maintains fidelity to the original legacy design while leveraging Power BI's capabilities and advantages.

"Vortex is a game changer for BI migration. It's the only solution I've seen that truly automates the process."
