

Plan Your Path to the Cloud with Us!

- Have you ever considered moving your ERP system to the cloud but are unsure how to handle customizations of your local solution during migration and what it means for your total cost of ownership? Are you interested in using modern AI technologies to relieve your employees and increase the productivity of your organization?
- Whether it's Dynamics NAV or Business Central, our experienced consultants will answer these exact questions in our AIM workshop. We will analyze your ERP environment and work with you to develop a customized roadmap for your journey to the cloud!

Agile Action with Attractive Licensing Offers

Benefit from exclusive licensing offers to gradually modernize critical business processes and achieve optimal results at every stage.

Innovative Approach to Stay Ahead of the Competition

Rely on innovative solutions to modernize your system with minimal risk and predictable outcomes.

Migration with an Experienced Team

Leverage our expertise to identify the added value for your business, employees, and customers. Together, we will define your core requirements and discuss the key steps for migrating to the cloud.

What to Expect in Our AIM Workshop :

01

Pre-Workshop Meeting (approx. 1 hour)

- Joint preparation for the workshop and discussion of workshop objectives
- Discussion of the customer questions catalog for the current application

02

One-day workshop (approx. 8 hours)

- Analysis of the current application
- Recording of the most important processes, functions and customer-specific customisations
- Discussion of the migration scenarios

03

Discussion of the results (approx. 2 hours)

- Technical recommendations for integrations, databases, processes, reporting and licensing
- Protocol (checklist)
- Recommendations for further action
