Digital Focus

FnBAngel, ShopAngel and MediAngel for brick and mortar SME

More collaborative and connecting O2O smart operations on mobile.

DigiOps2b transform brick and mortar SME with onlineization, digitization and algorithm.

Digital transformation is more than just good business—it's crucial to staying real time, relevant and profitable. organization lagging in this area risk losing ground to newer entrants in this era and business models that are poised to disrupt markets with innovative products and services with operations, customers and dynamic world.

Optimizing collaboration between human and artificial intelligence.

COLLABORATION MESSAGE

optimizing collaboration between humans and artificial intelligence with aZcentric. Five principles can help them do so: Reimagine business processes; embrace experimentation/employee involvement; actively direct AI strategy; responsibly collect data; and redesign business scenario process to incorporate AI and cultivate related employee skills.

process management

Over the last several years, we have **empowered** and these small businesses survive and beat the odds through **DigiOps2b** over Mobile internet with **digital transformation**, see small-business leaders move past **surviving and into thriving**

SMALL BUSINESS OWNER

collaborativ

Collaborative Intelligence

What comes naturally to people on **empathy, creation** and **story telling** can be tricky for machines, and what's straightforward for machines in analyzing gigabytes of data and react fast to these huge data remains virtually impossible for humans. ionTone collaborate both kinds of capabilities for **humans and AI actively enhance** each other's **complementary strengths**

Online, Digitize and Algorithm

01

BUSINESS SCENARIO PROCESS

scenario end to end process chains consist of various Business Processes and variants executed in a logical order. Placing day to day business Scenario onto BPM and geared towards the achievement of a defined business objective.

02

DIGITIZATION

process of converting information into a digital format and have insight and control to form total interaction with users on the process.

03

AUTOMATION

most effectively augment machines, how machines can enhance what humans do best, and how to redesign business processes to support the partnership and enable fast complex network action from big data

04

INTELLIGENT

reimagine business processes to optimize collaborative intelligence and vision2action to upgrade market and operations.

Robots assisting Humans

AMPLIFYING

Artificial intelligence can boost our analytic and decision-making abilities by providing the right information at the right time, and heighten creativity

INTERACTING

Human-robots collaboration enables companies to interact with employees and customers in novel, more effective ways and always online for mess.

EMBODYING

Robot augments human worker with their sophisticated sensors, process and data. Couple with machines learning to recognize people, things and actions and work alongside humans

RECONSTRUCTING

In order to get the most value from AI, operations need to be reconstruct. SME must first discover and describe an operational area that can be improved from real business scenarios and operations process
