Werdio Partner Program for the Enterprise

How We Work

We've reduced the time it takes to implement the best virtual desktop experience through our proven AVD Acceleration Framework and Optimisation with Nerdio

Understand

We kickoff with an assessment workshop to determine the **use cases** and **right components** of Azure to support an AVD + Nerdio deployment.

We then convert the outcomes into **actionable** items for the **design** process.

Design

We take the **best-practice** coupled with **extensive multi-industry experience** from our team to deliver a design that meets a customer's requirements each and every time through our **AVD Acceleration Framework t**o produce the Design for Implementation.

Implementation

Implementation is done through **infrastructure as code** ensuring it is efficient and repeatable.

We can take any team along for the ride, **upskilling** and **sharing knowledge** so when we are done, our customers' team is ready to run!

Run

Once deployed, AVD + Nerdio can grow with an organisation!

It starts small to keep costs low knowing our customers can easily **scale efficiently** when the time comes.

Introducing Nerdio Manager for Enterprise

Deployment, management and auto-scaling for AVD

- Manages Virtual Desktops using predefined, repeatable functions
- An hour to implement and deploy Windows Virtual Desktops
- Flexible Pricing structure
  - Monthly active users
  - Named users
- Intuitive User Interface
- Securely hosted in Azure and selected region
- Low upskilling effort for Windows/System Administrators
