

# Endpoint Management Workshop

**Manage and protect your devices, your apps, and your users**

Aztek welcomes you to transform and modernize your endpoint management through Endpoint Management Workshop.

Endpoint Manager can manage Windows 10, iOS, Android, macOS, and IoT devices as well as Microsoft 365 apps, SaaS apps, and line of business apps to reduce management complexity, improve end-user productivity, and ensure security.

With Microsoft Intune and Configuration Manager, you can manage modern endpoints with the most flexibility. This enables you to extend your Zero Trust security to include all applications, user identities, user data, and the device itself.

A unified platform including both Configuration Manager and Microsoft Intune

Learn how to improve your management capabilities with Microsoft Endpoint Manager.

Discover & Protect your endpoints by enforcing policies and deploying security tools.

Secure your users' identities with multi-factor authentication & conditional access from any device.

Enable your users to be productive with the applications they need, on the devices they want.

## Why should you attend our workshop?

When you have answered "YES" to at least one of those questions, it's time to transition from old IT management methods to modern IT management.

- Is a VPN required to access company resources?
- Does updating devices take too much time?
- Does the data center still run on-premise?
- Is the IT support provided locally?
- Do you know if your user's devices are compliant with your IT policies?

# WORKSHOP

## HIGHLIGHTS

- ☐ Improve your Secure Score with Microsoft Endpoint Manager
- ☐ Learn how to build management policies that protect your users, company data, and devices
- ☐ Gain insights about your users' endpoints and their compliance with your IT policies
- ☐ Determine the best way to give your users access to the apps they need on the devices of their choosing

## Why Aztek?

Aztek Technologies, a Microsoft Gold Partner, provides Cloud Professional Services and end-to-end Microsoft-based solutions for B2B from diverse industries. We are experts in DevOps, FinOps, OSS, automation, cloud migration & management, and security. Services such as these provide the backbone to ensure optimal business continuity and help implement new solutions for today's workplace that meet the needs of a dynamic office environment.
