Enhanced Care Management (ECM) for CalAIM

CalAIM Simplified, Care Amplified

- Informed Choices
- Improved Health Outcomes
- Flexible Care Solutions
- Continuous Insights
- Time & Administrative Savings

CalAIM, California's innovative healthcare initiative, demands a robust technological solution. Aztute is purpose-built for such programs, providing streamlined member management, secure data handling, and comprehensive coordination features. Our platform ensures efficiency and enhances health outcomes, making it the ideal choice for meeting CalAIM's intricate requirements.

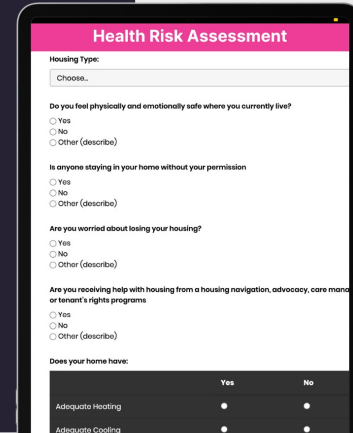

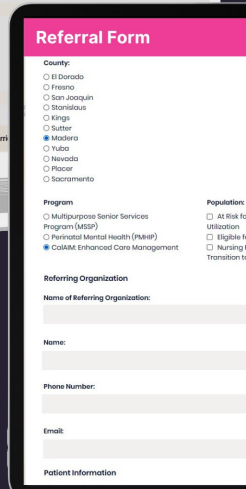

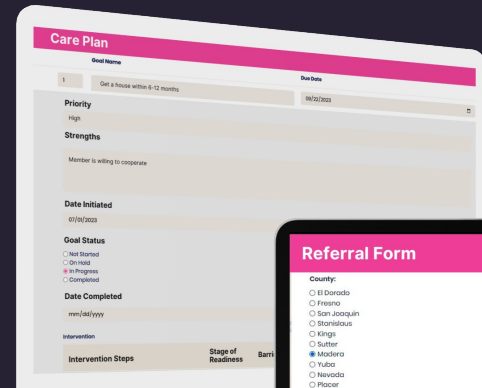

Optimized Care Delivery

Modernize and improve the delivery of healthcare services under Medi-Cal, with a focus on providing more person-centered, integrated, and effective care to California's residents in need.

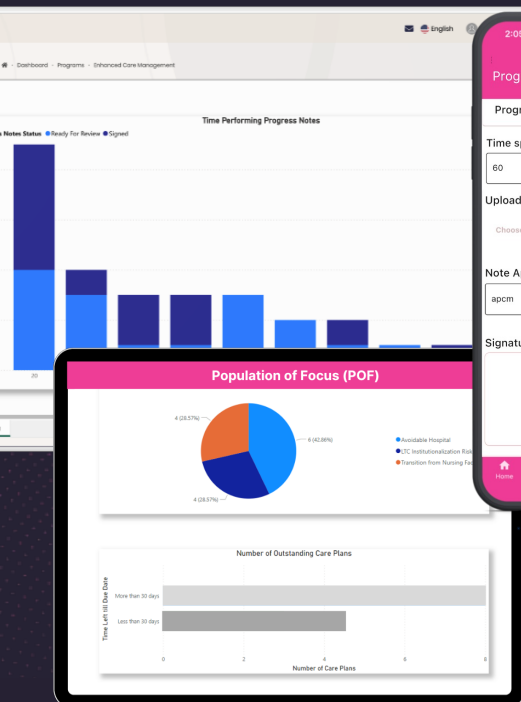

Comprehensive Health Assessment & Planning

- **Referral Management:**
Seamless management and tracking of referrals across providers.
- **Health Risk Assessments (HRAs) & Scoring:**
Comprehensive evaluation of health histories, SDOH, ADLs, and behavioral/physical health.
- **Care Plans with Detailed Interventions:**
Customized care plans designed to address individual needs with detailed interventions.
- **Social Determinants of Health (SDOH) Reporting:**
Insights into social factors impacting health for targeted interventions.

Care Management & Coordination

- **Provider Coordination & Engagement:**
Effective communication and notifications to facilitate provider collaboration.
- **Progress Notes Tracking:**
Centralized tracking of progress notes for effective care navigation and collaboration.
- **Integrated Tasks Management:**
Enhance care coordination and achieve SLA compliance through seamless task management integration.

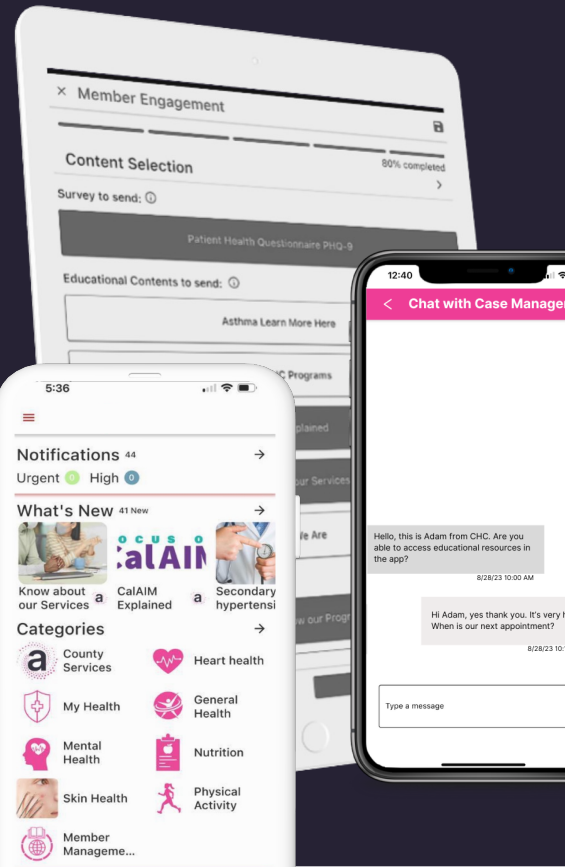

Improve Outcomes Through Collaboration

Member Engagement

- **Member Engagement Tools:** Ensure secure communication via apps and portals, utilizing alerts and reminders to enhance engagement effectively.
- **Remote Patient Monitoring:** Monitoring tools for remote tracking of patient health and well-being.
- **Outreach and Member Enrollment:** Efficient member enrollment and engagement strategies for enhanced participation
- **Personalized Member Education:** Tailored educational content covering program benefits, safety, wellness, mental health, and more.

Data-Driven Insights and Program Management

- **Program Management Dashboard:** Centralized platform for comprehensive program oversight and management.
- **Interoperability with Health Plans & Providers:** Integration with Health plans, EHR systems, laboratories, and healthcare software for data exchange.
- **Integration with DxF** Integration with the CalHHS Data Exchange Framework (DxF) to facilitate the secure and appropriate exchange of health and social services information to provide safe, effective, whole-person care.
- **Member Billing Solutions:** Seamless member billing for PMPM, FFS, and SDOH services to enhance financial efficiency.

Aztute: A Comprehensive Health Platform For Communities

Aztute is a revolutionary digital health platform founded on three core pillars: data, education, and collaboration. By harnessing advanced analytics, real-time reporting, and collaborative tools, Aztute surpasses traditional health systems, providing holistic, data-driven solutions. Aztute offers pre-built support for a wide range of programs, from mental health to communicable diseases, with the flexibility to use them as-is or customize them to align with your organization's workflows and needs. With an integrated view that includes Social Determinants of Health (SDOH), Aztute enhances community insights and emphasizes proactive interventions and community engagement for data-driven community healthcare.

Our CalAIM Solution

Our platform ensures efficiency and enhances health outcomes, making it the ideal choice for meeting CalAIM's intricate requirements. This innovative platform plays a pivotal role in bolstering the CalAIM program, enhancing its effectiveness through streamlined member intake, efficient outreach, personalized care plans, and seamless coordination among providers. It serves as a catalyst in realizing CalAIM's vision of advancing healthcare services in California, driven by data and focused on better patient outcomes.
