Financial Reporting

What is the Power Platform?

The 'Power Platform' is a collection of four Microsoft products: Power BI, PowerApps, Power Automate, and Power Virtual Agent. These products help easily manipulate, surface, automate and analyse data using low-code / no-code development and can be used with other Microsoft

Products (Excel, SharePoint, OneDrive, etc.) as well as other third-party apps.

Power Automate

Include powerful workflow automation directly in your apps with a no-code approach that connects to hundreds of popular apps and services.

Power BI

Unify data from many sources to create interactive, immersive dashboards and reports that provide actionable insights and drive business results.

Power Apps

Build apps in hours—not months—that easily connect to data, use Excel-like expressions to add logic, and run on the web, iOS, and Android devices.

Power Virtual Agent

Easily build chatbots to engage conversationally with your customers and employees—no coding required.

Get The Job Done Right The First Time

We take the hassle out of running your business so you can focus on the parts that matter most to you. Our business is to make sure your solution works for you, every time, guaranteed.
