WHAT IS DEDICATED AUTOMATION ASSISTANCE?

The dedicated automation assistance program allows for your organization to have one of our personnel remotely embedded to assist with internal automation efforts for 40HR a week. Due to the speed that automated software can usually be built/deployed at, this program tends to offer the highest ROI as the cost is fixed while the ROI is recurring.

WHY NOT JUST BUILD BOTS?

We are big advocates of building a relationship with the companies we work with, understanding their processes, and assisting in automating these processes through consistent engagements over time. By allocating a defined period of time set aside for exploring automation initiatives, we are able to build/maintain/optimize across a multitude of areas, giving us the confidence that your organization is left with tools that will outlive most.

WHAT KIND OF RETURN CAN I EXPECT?

It truly depends on your organization's appetite for automation. Do you just have one idea, or do you have many and are interested in seeing many of them out? Do you have an understanding of the time spent on these tasks/rate of the person currently completing them? If so, it's very easy to put pen to paper – We actually have a tool to assist with this (found [here](#)).

Dedicated Automation Assistance Schedule

Month	Week 1	Week 2	Week 3	Week 4
1	Multi-Process Identification	Multi-Process Identification	Process Filtering & Selection	Development
2	Development	User Testing/Additional Development	User Testing/Additional Development	Production
