

# Assess your DevOps practice maturity:

ensure your business software development efficiency by executing strategic improvements

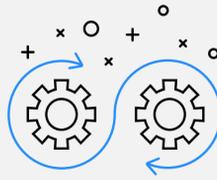

DevOps initiatives

## DO YOU KNOW?

According to [Gartner](#), 75% of DevOps initiatives, predicted to fail meeting expectations due to organizational learning and change issues in 2022.

## HOW TO SOLVE?

DevOps practice adoption might be turning mainstream, although such a strategic approach to culture, automation and platform design can surely boost applications and service delivery generally improving your business value.

## WE OFFER A DEVOPS ASSESSMENT SERVICE

To evaluate, build up and execute improvements for product development, helping effectively manage application development and optimal payback of your software investments.

## IS YOUR BUSINESS FACING SUCH PAIN POINTS?

### Deployment & post release issues

Are you tired of frequent and regular production problems caused by the same or unknown root?

### Product outages performance issues

Does your product often break or experience downtime under peak load?

### Manual disaster recovery

Have you ever felt the struggle when carrying the entire disaster recovery procedure manually?

### Different security risks

Do you experience potential risks' uncertainty in your code, infrastructure or 3rd party components?
