Everything you need to know to empower a mobile workforce

With "working from home" becoming a business necessity for some organizations, business leaders and IT rush to explore the best ways to inject mobile productivity, security and automation to their processes.

Dhanesh Valappil, technical director from Microsoft certified partner Bamboo Technologies, will illustrate how leaders in business management and organizational transformation like you could re-imagine your digital strategies for empowering a **mobile workforce**. Sign up for the #PowerUP webinar series to understand how you could adopt process automation, AI and even virtual agents on an end-to-end platform that leaves no worries for complex integrations or coding development.

MS HK 5G IoT Center Booth

Bamboo's Site Inspection Solution (based on a low code/no code Microsoft Power Platform) is officially launched in Microsoft HK's new 5G IoT space on Jun 24, 2020.

MS HK 5G IOT Center Booth

Temperature, humidity and equipment are the key to wine storage. In order to obtain high-quality wine, the storage condition is extremely important. In this demonstration, we simulate a wine cellar to see how **Bamboo Site Inspection Solution** to realize the automate work orders executions.

- When the wine barrel leaks, IoT sensor is triggered, system automatically creates a ticket and send it to supervisor.
- Supervisor assigns the ticket to the engineer.
- Engineer arrives the leaking wine barrel according to the unique equipment code, repaired it.
- Engineer reports the result using smartphone by collecting information with text, audio, and pictures.
- Supervisor evaluates and finally mark the work order as completed.

Physical Components:

- Backdrop: Wine Cellar
- Illustrative pictures & videos played on the background screen
- Props: Wine barrels, Storage box
- Equipment: IoT sensors, Laptops, Smart Phones
