

# Power Platform Solution Assessment

Get the full potential of Power Platform solutions for innovation and strategy in your organisation

AUD 7,500

Understand the full potential of Power Platform solutions and how low code can become a platform for innovation and strategy in your organisation. Barhead's Power Platform specialists facilitate the ideation process to help you identify your specific use cases and provide actionable next steps.

## Included Activities:

**Day 1**  
Power Platform enablement session  
2 hours

Following the session, you will document your potential use cases using the templates provided.

**Day 2**  
Ideation workshop  
4 hours

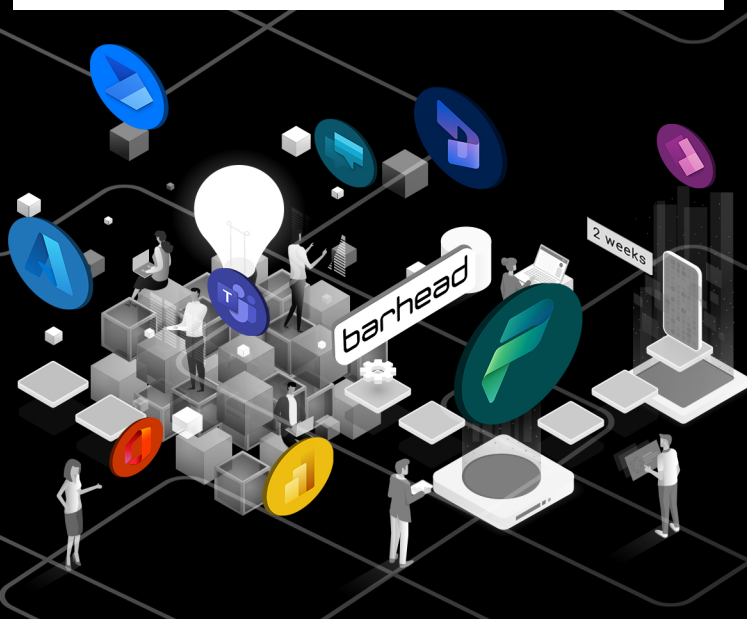

Facilitated workshop to explore business value, success criteria and viability of Power Platform solutions for each use case.

**Day 3**  
Case inventory and documentation  
(No customer participation on this day)

Creation of a use-case inventory and documentation of high-level solutions, priorities and next steps.

**Day 4**  
Executive session: Playback and next steps  
2 hours

Sessions on playback and next steps.

## Business outcomes:

Inventory of business ideas including high-level assessment of solution, complexity and t-shirt sizing.

Recommended next steps for a rapid implementation of an MVS (minimum viable solution) for the selected use case that fits into a 2-week timeframe.

## Assumptions:

We will explore up to 5 use cases in-depth during the ideation workshop.

If additional uses cases are identified, Barhead will triage them for suitability for the Power Platform and recommend a follow-up activity for further assessment if required.
