Orange Business – Digital Services

 **Business**

# Microsoft Fabric Starter

## At The Heart Of The Data To Value Journey

The Modern data platform starter is at the heart of the data to value journey with a very strong focus from one hand on the **Data architecture & infrastructure** and on another hand on the **data services**.

However, the team realizing the mission will attach a particular attention to ensure the use case selected is perfectly aligned with the **company data strategy** allowing a **perfect integrability at scale**

Also, one important aspect of the next gen data platform is the **data governance** with a strong focus on **data quality** during this POC implementation.

# Next Gen Data Platform Starter

## Our Unique Value Proposition

### Demonstrate Value Quickly

Realize an end-to-end use case  
in less than **2 months**

### Turnkey & Proven Offer

Orange Business takes care of  
everything.  
No investment on a platform of its own  
and a controlled budget.

### Data Partner

Engage in a Data Partner approach by  
accompanying your teams in the POC and  
deployment of your future cloud platform

### One Team

Collaborate within the framework of a  
process between IT, the business and  
Orange Business .

### Orange Business Expertise

Access to over 40 certified experts in the  
region on innovative technologies (Data  
platform, advanced Bi, data cloud,  
augmented analytics, data gov...)

### Awareness Of Your Teams

Getting to grips with a cloud ecosystem with a  
practical case study.

## Co-Development Squad

### Fixed Core Team

(Data architect, Data Engineers, Data visualization expert)

### Flexible Team

(Customer engagement expert, Digital solutions architect, Web analytics expert)

### Extended Team

(Account Manager, Engagement Manager)

To implement the first use case in co-development Orange Business proposes to activate the following configuration:

- **A core team** that will work in collaboration with your development team to co-develop the use case. The involvement of Orange Business experts will decrease as your autonomy increases:
  - Data architect
  - Senior Data Ops engineer
  - Medior Data engineer
  - Data visualisation expert
- **A flexible team** composed of subject matter experts that can be activated up on request for a specific project need.

This set-up has been extensively used for previous similar projects yielding thorough, desirable outcomes, without overcrowding the project team, nor elevating the cost of the project.

Business

# MS Fabric starter

Orange business help you to implement tailor made components of your new and improved Azure data platform that will fit the needs of your modern business and enable you to focus on what you do with your data and not how to manage data.

## This is for you if...

You have an aging or basic data & analytics landscape, but you are facing:

- Rapid growth in data volume
- Siloed data and difficult integration with new external sources
- Increasing complexity of your data platform
- Concerns about maintenance and cost-effectiveness
- Emerging use cases that your existing data and analytics infrastructure cannot accommodate
- A desire to avoid the burden of managing all aspects of the infrastructure

## Benefits:

**MS Fabric** platform starter /proof of concept (POC) is tailored to address these issues and propel your organization towards a more advanced and efficient data ecosystem..

## Deliverables:

- **Component Configuration and Implementation:** Setup and configuration of MS Fabric components such as Storage Account, Experiences, Capabilities.
- **Data Pipeline Delivery:** Build and deliver data pipelines using Azure services to enable efficient data flow and integration across your environment.
- **Performance & Cost Management:** Implement best practices for managing costs and optimize performance ensuring a cost-effective MS Fabric solution.
