

## Windows 365 PoC

Discover the power of Windows 365 – your solution for effortless Windows 11 desktop provisioning in the cloud. Say goodbye to complex virtualization platforms.

baseVISION helps you to plan and implement a Windows 365 PoC with our standardized proof of concept (PoC) offering.

### Windows 365 provides the following features:

- Flexible licensing options including concurrent licensing with Windows 365 frontline
- Automatic Cloud PC provisioning
- Dedicated Cloud PC for end-users, external consultants or administrators

### The service consists of the following deliverables:

#### Workshop

In the workshop, we'll cover Windows 365 prerequisites, features, and real-world use cases.

#### Initial Setup

We support you with getting Windows 365 (enterprise or frontline) up and running in your environment.

#### Documentation

Windows 365 concept and configuration documentation.

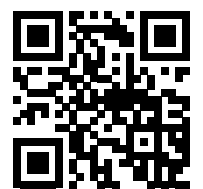

### Windows 365 Cloud PCs provide the following benefits:

- Automatic provisioning of Windows 11 desktops
- Provide end-users virtual desktops without managing a whole desktop virtualization platform
- Grant mergers, external consultants or parties secure access to your infrastructure and apps
- Leverage Intune for secure device management and configuration capabilities
- Access Windows 365 from everywhere with the Windows 365 app or browser-based access

We make your IT  
workplace ready  
for the future -

modern, flexible  
and secure.
